

CANADIAN JOURNAL OF SOIL SCIENCE

Volume 95, Number 1

February 2015

Physical Processes and Interfaces

Carbon dynamics in a biochar-amended loamy soil under switchgrass
S. E. Allaire, B. Baril, A. Vanasse, S. F. Lange, J. MacKay, and D. L. Smith 1–13

An evaluation of air permeability measurements to characterize the saturated hydraulic conductivity of soil reclamation covers
M. Huang, H. Rodger, and S. L. Barbour 15–26

Unsaturated water flux at mid and lower slope positions within an inclined landscape of the Dark Brown soil zone in southern Alberta
J. J. Miller and D. S. Chanasyk 27–36

Management for Agricultural, Forestry and Urban Uses

Effects of biochar and/or dolomitic limestone application on the properties of Ultisol cropped to maize under glasshouse conditions
M. A. Rabileh, J. Shamshuddin, Q. A. Panhwar, A. B. Rosenani, and A. R. Anuar 37–47

Upscaling modelled crop yields to regional scale: A case study using DSSAT for spring wheat on the Canadian prairies
T. Huffman, B. Qian, R. De Jong, J. Liu, H. Wang, B. McConkey, T. Brierley, and J. Yang 49–61

Predicting soil nitrogen supply from soil properties
J. Dessureault-Rompré, B. J. Zebarth, D. L. Burton, and A. Georgallas 63–75
