

Welfare, Behaviour and Management

Effects of resting perennial pastures during the sensitive pre-dormancy period in western Manitoba: Pasture productivity and beef cattle performance

O. N. Durunna, V. Baron, S. L. Scott,
C. Robins, M. Khakbazan, and H. C. Block 129–141

Concurrent supplementation of arginine and antioxidant vitamins E and C reduces oxidative stress in broiler chickens after a challenge with *Eimeria* spp.

P. A. Dominguez, A. Pro-Martinez, C. Narciso- Gaytán,
A. Hernández-Cázares, E. Sosa-Montes,
P. Perez-Hernandez, D. Caldwell, and
C. A. Ruiz-Feria 143–153

Breeding and Genetics

Genetic parameter estimation and evaluation of Duroc boars for feed efficiency and component traits

M. D. MacNeil and R. A. Kemp 155–159

SHORT COMMUNICATION: New alleles at the BoLA-DQA1 locus in Holstein–Friesian cattle

D. Kulaj, J. Pokorska, M. Ormian,
and M. Dusza 161–164

Growth and Development

Effect of γ -aminobutyric acid on growth performance, behavior and plasma hormones in weaned pigs

Y. H. Li, F. Li, M. Liu, J. J. Yin, B. J. Cheng,
B. M. Shi, and A. S. Shan 165–171

Meat Science

Effects of forage silage species on yearling growth performance, carcass and meat quality, and nutrient composition in a forage based beef production system

R. Berthiaume, C. Lafrenière, C. Girard,
C. P. Campbell, L. M. Pivotto, and
I. B. Mandell 173–187

Color stability and antioxidant capacity of yak meat as affected by feeding with pasture or grain

C. Chen, L. Han, Q.-L. Yu,
and R.-R. Li 189–195

Nonruminant Nutrition

The efficacy of anti-mycotoxin feed additives in preventing the adverse effects of wheat naturally contaminated with *Fusarium* mycotoxins on performance, intestinal barrier function and nutrient digestibility and retention in weanling pigs

B. V. L. Thanh, M. Lessard, Y. Chorfi,
and F. Guay 197–209

Colostrum production in sows fed different sources of fiber and fat during late gestation

U. Krogh, T. S. Bruun, C. Amdi, C. Flummer,
J. Poulsen, and P. K. Theil 211–223

Empiric narrowing of the net energy value of reduced-oil corn distillers' dried grain with solubles for growing-finishing pigs

M. N. Smit, V. Zamora, M. G. Young,
N. G. Campbell, B. Uttaro, and E. Beltranena 225–241

Ruminant Nutrition

Effect of feeding strategically blended feed pellets on rumen fermentation and nutrient digestion

M. G. Zenobi, H. A. Lardner, P. G. Jefferson,
and J. J. McKinnon 243–254

Effect of rumen degradable energy supplementation on forage utilization and performance of steers grazing stockpiled cool season perennial grass pastures

F. Añez-Osuna, G. B. Penner, K. Larson, P. G. Jefferson,
H. A. Lardner, and J. J. McKinnon 255–265

Response of lactating dairy cows to dietary protein from canola meal or distillers' grains on dry matter intake, milk production, milk composition, and amino acid status

I. P. Acharya, D. J. Schingoethe,
K. F. Kalscheur, and D. P. Casper 267–279

Effects of dietary total non-structural carbohydrates and folic acid and vitamin B₁₂ supplement on growth and meat quality of yearling steers in a forage-based beef production system

J. Mercier, D. Cinq-Mars, R. Berthiaume,
L. Faucitano, and C. L. Girard 281–291

Estimating plasma volume in neonatal Holstein calves fed one or two feedings of a lacteal-based colostrum replacer using Evans blue dye and hematocrit values at various time points

R. G. Cabral, C. E. Chapman, E. J. Kent,
and P. S. Erickson 293–298

SHORT COMMUNICATION: The effect of seed hardness and malting characteristics on in situ dry matter digestibility of barley grain in beef heifers

S. Ding, M. Oba, M. L. Swift, M. Edney,
J. T. O'Donovan, T. A. McAllister,
and W. Z. Yang 299–303

Other

Beef cattle husbandry practices across Ecoregions of Canada in 2011

S. C. Sheppard, S. Bittman, G. Donohoe, D. Flaten,
K. M. Wittenberg, J. A. Small, R. Berthiaume,
T. A. McAllister, K. A. Beauchemin, J. McKinnon,
B. D. Amiro, D. MacDonald, F. Mattos, and
K. H. Ominski 305–321

Acknowledgement of Reviewers 323–324
