Ontario restricts use of bee-killing pesticides  
Tackling ocean plastic in the laundry room  
Delhi to phase out old cars to cut pollution  
Could agriculture and forestry one day aid biodiversity?  
Two US mussels get miles of critical habitat  
Crickets won't feed the world after all  
Traffic noise drowns out fish flirtation

---

## 241 Write Back

Letters to the editor regarding the contents of past issues and comments on topics of current concern to *Frontiers* readers

---

## 244 Research Communications

The potential for local croplands to meet US food demand  
*A Zumkehr and JE Campbell*

---

## 249 Reviews

Climate-change adaptation on rangelands: linking regional exposure with diverse adaptive capacity  
*DD Briske, LA Joyce, HW Polley, JR Brown, K Wolter, JA Morgan, BA McCarl, and DW Bailey* 249

The portfolio concept in ecology and evolution  
*DE Schindler, JB Armstrong, and TE Reed* 257

---

## 265 Concepts and Questions

Interval squeeze: altered fire regimes and demographic responses interact to threaten woody species persistence as climate changes  
*NJ Enright, JB Fontaine, DMJS Bowman, RA Bradstock, and RJ Williams* 265

Crafting and evaluating Broader Impact activities: a theory-based guide for scientists  
*MM Skrip* 273

---

## 280 Natural History Notes

Yellow-cedar: climate change and natural history at odds  
*J Krapek and B Buma*

---

## 282 Writing Competition Winners

Recently, ESA held a creative writing contest – The Future Of Ecology 2065 – to celebrate the Society's centennial. The challenge, in 800 words or less, was to think of the future, and imagine what the discipline of ecology will be like in 50 years.

---

## 284 Frontiers Trading Post

Products, services, academic programs and courses, employment opportunities, awards, announcements, conferences, and meetings

---

## 288 Life Lines

Learning to *live* with leopards  
*A Burton*
