

EDITORIAL

- 1 Ocean wanderers

OPINION & COMMENT

- 2 Correspondence: Declining availability of outdoor skating in Canada
- 4 Commentary: Institutional coordination of global ocean observations
Wenju Cai, Susan K. Avery, Margaret Leinen, Kenneth Lee, Xiaopei Lin and Martin Visbeck
- 6 Commentary: Responding to adaptation emergencies
Jim W. Hall, Frans Berkhout and Rowan Douglas
- 8 Commentary: Messaging climate change uncertainty
Roger M. Cooke
- 10 Commentary: A balanced-efforts approach for climate cooperation
Robert C. Schmidt
- 12 Commentary: Lessons learned from ocean acidification research
Ulf Riebesell and Jean-Pierre Gattuso
- 15 Commentary: Carbon finance and the carbon market in China
Xiang Yu and Alex Y. Lo

ANALYSIS

- 17 Market Watch: A tandem production
Anna Petherick

RESEARCH HIGHLIGHTS

- 19 Our choice from the recent literature

NEWS & VIEWS

- 20 Oceanography: A roadmap on ecosystem change
John P. Dunne
- 21 Atmospheric chemistry: Climate's chemical sensitivity
David S. Stevenson

PERSPECTIVE

- 23 Livelihood resilience in the face of climate change
Thomas Tanner *et al.*

REVIEW ARTICLE

- 27 Effects of tropical deforestation on climate and agriculture
Deborah Lawrence and Karen Vandecar

LETTERS

- 37 Acting green elicits a literal warm glow
Danny Taufik, Jan Willem Bolderdijk and Linda Steg
- 41 A large ozone-circulation feedback and its implications for global warming assessments
Peer J. Nowack, N. Luke Abraham, Amanda C. Maycock, Peter Braesicke, Jonathan M. Gregory, Manoj M. Joshi, Annette Osprey and John A. Pyle
→N&V p21

- 46 Dramatically increasing chance of extremely hot summers since the 2003 European heatwave**
Nikolaos Christidis, Gareth S. Jones and Peter A. Stott
- 51 Supraglacial lakes on the Greenland ice sheet advance inland under warming climate**
A. A. Leeson, A. Shepherd, K. Briggs, I. Howat, X. Fettweis, M. Morlighem and E. Rignot
- 56 Weaker soil carbon–climate feedbacks resulting from microbial and abiotic interactions**
Jinyun Tang and William J. Riley
- 61 Physiological plasticity increases resilience of ectothermic animals to climate change**
Frank Seebacher, Craig R. White and Craig E. Franklin
- 67 Permafrost collapse after shrub removal shifts tundra ecosystem to a methane source**
Ake L. Nauta, Monique M. P. D. Heijmans, Daan Blok, Juul Limpens, Bo Elberling, Angela Gallagher, Bingxi Li, Roman E. Petrov, Trofim C. Maximov, Jacobus van Huissteden and Frank Berendse

ARTICLES

- 71 Biological ramifications of climate-change-mediated oceanic multi-stressors**
Philip W. Boyd, Sinikka T. Lennartz, David M. Glover and Scott C. Doney
