Research Articles

- 1 *Ciaran J. Harman*
Time-variable transit time distributions and transport: Theory and application to storage-dependent transport of chloride in a watershed (doi 10.1002/2014WR015707)
- 31 *Shane J. Vatland, Robert E. Gresswell, and Geoffrey C. Poole*
Quantifying stream thermal regimes at multiple scales: Combining thermal infrared imagery and stationary stream temperature data in a novel modeling framework (doi 10.1002/2014WR015588)
- 47 *Eftila Tanellari, Darrell Bosch, Kevin Boyle, and Elton Mykerezzi*
On consumers' attitudes and willingness to pay for improved drinking water quality and infrastructure (doi 10.1002/2013WR014934)
- 58 *Orapan Nabangchang, Maura Allaire, Prinyarat Leangcharoen, Rawadee Jarungrattanapong, and Dale Whittington*
Economic costs incurred by households in the 2011 Greater Bangkok flood (doi 10.1002/2014WR015982)
- 78 *Yadu N. Pokhrel, Sujan Koirala, Pat J.-F. Yeh, Naota Hanasaki, Laurent Longuevergne, Shinjiro Kanae, and Taikan Oki*
Incorporation of groundwater pumping in a global Land Surface Model with the representation of human impacts (doi 10.1002/2014WR015602)
- 97 *Markus Wehrer and Lee D. Slater*
Characterization of water content dynamics and tracer breakthrough by 3-D electrical resistivity tomography (ERT) under transient unsaturated conditions (doi 10.1002/2014WR016131)
- 125 *Elena Maggioni*
Water demand management in times of drought: What matters for water conservation (doi 10.1002/2014WR016301)
- 140 *Richard T. Melstrom, Frank Lupi, Peter C. Esselman, and R. Jan Stevenson*
Valuing recreational fishing quality at rivers and streams (doi 10.1002/2014WR016152)
- 151 *Xi Chen and Lee Slater*
Gas bubble transport and emissions for shallow peat from a northern peatland: The role of pressure changes and peat structure (doi 10.1002/2014WR016268)
- 169 *Donatella D'Onofrio, Mara Baudena, Fabio D'Andrea, Max Rietkerk, and Antonello Provenzale*
Tree-grass competition for soil water in arid and semiarid savannas: The role of rainfall intermittency* (doi 10.1002/2014WR015515)
- *This article is part of a Special Section—Eco-hydrology of Semiarid Environments: Confronting Mathematical Models with Ecosystem Complexity**
- 182 *Luca Milanese, Marco Pilotti, and Roberto Ranzi*
A conceptual model of people's vulnerability to floods (doi 10.1002/2014WR016172)
- 198 *Dylan J. Irvine, Roger H. Cranswick, Craig T. Simmons, Margaret A. Shanafield, and Laura K. Lautz*
The effect of streambed heterogeneity on groundwater-surface water exchange fluxes inferred from temperature time series (doi 10.1002/2014WR015769)
- 213 *Anna Åkesson, Anders Wörman, and Andrea Bottacin-Busolin*
Hydraulic response in flooded stream networks (doi 10.1002/2014WR016279)
- 241 *Olaf A. Cirpka, Gabriele Chiogna, Massimo Rolle, and Alberto Bellin*
Transverse mixing in three-dimensional nonstationary anisotropic heterogeneous porous media* (doi 10.1002/2014WR015331)
- *Companion to Chiogna et al. [2015], doi:10.1002/2014WR015330.**
- 261 *Gabriele Chiogna, Olaf A. Cirpka, Massimo Rolle, and Alberto Bellin*
Helical flow in three-dimensional nonstationary anisotropic heterogeneous porous media* (doi 10.1002/2014WR015330)
- *Companion to Cirpka et al. [2015], doi:10.1002/2014WR015331.**

- 281 *David Gaeuman, Craig R. Holt, and Kristin Bunte*
Maximum likelihood parameter estimation for fitting bedload rating curves (doi 10.1002/2014WR015872)
- 302 *Catherine Shields and Christina Tague*
Ecohydrology in semiarid urban ecosystems: Modeling the relationship between connected impervious area and ecosystem productivity (doi 10.1002/2014WR016108)
- 320 *Jonathan A. Czuba, Timothy D. Straub, Christopher A. Curran, Mark N. Landers, and Marian M. Domanski*
Comparison of fluvial suspended-sediment concentrations and particle-size distributions measured with in-stream laser diffraction and in physical samples (doi 10.1002/2014WR015697)
- 341 *Erik Lichtenberg, John Majsztrik, and Monica Saavoss*
Grower demand for sensor-controlled irrigation (doi 10.1002/2014WR015807)
- 359 *S. U. Salmon, H. Prommer, J. Park, K. T. Meredith, J. V. Turner, and J. L. McCallum*
A general reactive transport modeling framework for simulating and interpreting groundwater ^{14}C age and $\delta^{13}\text{C}$ (doi 10.1002/2014WR015779)
- 377 *Luciana Orlando and Beatrice Renzi*
Electrical permittivity and resistivity time lapses of multiphase DNAPLs in a lab test (doi 10.1002/2014WR015291)
- 390 *Nitin Joshi, C. S. P. Ojha, P. K. Sharma, and Chandra A. Madramootoo*
Application of nonequilibrium fracture matrix model in simulating reactive contaminant transport through fractured porous media (doi 10.1002/2014WR016500)
- 409 *Limeng Pan, Mashor Housh, Pan Liu, Ximing Cai, and Xin Chen*
Robust stochastic optimization for reservoir operation (doi 10.1002/2014WR015380)
- 430 *Rodrigo C. D. Paiva, Michael T. Durand, and Faisal Hossain*
Spatiotemporal interpolation of discharge across a river network by using synthetic SWOT satellite data (doi 10.1002/2014WR015618)
- 450 *Avner Silber, Yair Israeli, Idan Elingold, Menashe Levi, Irit Levkovitch, David Russo, and Shmuel Assouline*
Irrigation with desalinated water: A step toward increasing water saving and crop yields (doi 10.1002/2014WR016398)
- 465 *K. Mahmud, G. Mariethoz, A. Baker, and A. Sharma*
Integrating multiple scales of hydraulic conductivity measurements in training image-based stochastic models (doi 10.1002/2014WR016150)
- 481 *Daniel Paradis, René Lefebvre, Erwan Gloaguen, and Alfonso Rivera*
Predicting hydrofacies and hydraulic conductivity from direct-push data using a data-driven relevance vector machine approach: Motivations, algorithms, and application (doi 10.1002/2014WR015452)
- 506 *Simon A. Mathias, Todd H. Skaggs, Simon A. Quinn, Sorcha N. C. Egan, Lucy E. Finch, and Corinne D. Oldham*
A soil moisture accounting-procedure with a Richards' equation-based soil texture-dependent parameterization (doi 10.1002/2014WR016144)
- 524 *Grey S. Nearing and Hoshin V. Gupta*
The quantity and quality of information in hydrologic models (doi 10.1002/2014WR015895)
- 539 *Andrew Smith, Christopher Sampson, and Paul Bates*
Regional flood frequency analysis at the global scale (doi 10.1002/2014WR015814)
- 554 *S. Munier, A. Polebistki, C. Brown, G. Belaud, and D. P. Lettenmaier*
SWOT data assimilation for operational reservoir management on the upper Niger River Basin (doi 10.1002/2014WR016157)
- 576 *Jiangjiang Zhang, Lingzao Zeng, Cheng Chen, Dingjiang Chen, and Laosheng Wu*
Efficient Bayesian experimental design for contaminant source identification (doi 10.1002/2014WR015740)
- 599 *Chloe Mawer, Rosemary Knight, and Peter K. Kitanidis*
Relating relative hydraulic and electrical conductivity in the unsaturated zone (doi 10.1002/2014WR015658)
- 619 *Nathaniel W. Chaney, Joshua K. Roundy, Julio E. Herrera-Estrada, and Eric F. Wood*
High-resolution modeling of the spatial heterogeneity of soil moisture: Applications in network design (doi 10.1002/2013WR014964)
- 639 *Marco Marani and Stefano Zanetti*
Long-term oscillations in rainfall extremes in a 268 year daily time series (doi 10.1002/2014WR015885)
- 648 *R. T. Arnold, Christian Troost, and Thomas Berger*
Quantifying the economic importance of irrigation water reuse in a Chilean watershed using an integrated agent-based model (doi 10.1002/2014WR015382)

669 *Yiğit Sağlam*
Supply-based dynamic Ramsey pricing: Avoiding water shortages (doi 10.1002/2013WR015155)

685 *Mohammad Shamsudduha, Richard G. Taylor, and Richard E. Chandler*
A generalized regression model of arsenic variations in the shallow groundwater of Bangladesh
(doi 10.1002/2013WR014572)

704 *Zachary H. Bowen, Gretchen P. Oelsner, Brian S. Cade, Tanya J. Gallegos, Aida M. Farag, David N. Mott, Christopher J. Potter, Peter J. Cinotto, Melanie L. Clark, William M. Kappel, Timothy M. Kresse, Cynthia P. Melcher, Suzanne S. Paschke, David D. Susong, and Brian A. Varela*
Assessment of surface water chloride and conductivity trends in areas of unconventional oil and gas development—Why existing national data sets cannot tell us what we would like to know
(doi 10.1002/2014WR016382)

Opinion Article

716 *Pablo A. Mendoza, Martyn P. Clark, Michael Barlage, Balaji Rajagopalan, Luis Samaniego, Gab Abramowitz, and Hoshin Gupta*
Are we unnecessarily constraining the agility of complex process-based models?
(doi 10.1002/2014WR015820)

Review Article

729 *Stefan Iglauer, C. H. Pentland, and A. Busch*
CO₂ wettability of seal and reservoir rocks and the implications for carbon geo-sequestration
(doi 10.1002/2014WR015553)

Technical Note

775 *Chelsea L. Arnold and Teamrat A. Ghezzehei*
A method for characterizing desiccation-induced consolidation and permeability loss of organic soils*
(doi 10.1002/2014WR015745)
