

The online article is the official version and may contain additional content not available in this print issue. To access the full article, including multimedia, enhanced figures, supporting information, and other nonprinted content, go to <http://wrr.agu.org>.

Research Articles

- 787** *Taeyeon Yoon, Charles Rhodes, and Farhed A. Shah*
Upstream water resource management to address downstream pollution concerns: A policy framework with application to the Nakdong River basin in South Korea (doi 10.1002/2013WR014201)
- 806** *J. Koch and W. Nowak*
Predicting DNAPL mass discharge and contaminated site longevity probabilities: Conceptual model and high-resolution stochastic simulation (doi 10.1002/2014WR015478)
- 832** *Ali Boroumand and Linda M. Abriola*
On the upscaling of mass transfer rate expressions for interpretation of source zone partitioning tracer tests (doi 10.1002/2014WR015767)
- 848** *Kristopher L. Kuhlman, Bwalya Malama, and Jason E. Heath*
Multiporosity flow in fractured low-permeability rocks (doi 10.1002/2014WR016502)
- 861** *Matthew W. Over, Ute Wollschläger, Carlos Andres Osorio-Murillo, and Yoram Rubin*
Bayesian inversion of Mualem-van Genuchten parameters in a multilayer soil profile: A data-driven, assumption-free likelihood function (doi 10.1002/2014WR015252)
- 885** *L. P. Galway, D. M. Allen, M. W. Parkes, L. Li, and T. K. Takaro*
Hydroclimatic variables and acute gastro-intestinal illness in British Columbia, Canada: A time series analysis* (doi 10.1002/2014WR015519)
- *This article is part of a Special Section—Hydroepidemiology: A pathway to link hydrology and climate with human health**
- 896** *T. R. Kjeldsen and I. Prosdocimi*
A bivariate extension of the Hosking and Wallis goodness-of-fit measure for regional distributions (doi 10.1002/2014WR015912)
- 908** *Andrew Verdin, Balaji Rajagopalan, William Kleiber, and Chris Funk*
A Bayesian kriging approach for blending satellite and ground precipitation observations (doi 10.1002/2014WR015963)
- 922** *G. Vandersteen, U. Schneidewind, C. Anibas, C. Schmidt, P. Seuntjens, and O. Batelaan*
Determining groundwater-surface water exchange from temperature-time series: Combining a local polynomial method with a maximum likelihood estimator (doi 10.1002/2014WR015994)
- 940** *Peter K. Kang, Tanguy Le Borgne, Marco Dentz, Olivier Bour, and Ruben Juanes*
Impact of velocity correlation and distribution on transport in fractured media: Field evidence and theoretical model (doi 10.1002/2014WR015799)
- 960** *A. C. Lute, J. T. Abatzoglou, and K. C. Hegewisch*
Projected changes in snowfall extremes and interannual variability of snowfall in the western United States (doi 10.1002/2014WR016267)
- 973** *Qian Dang, Xiaowen Lin, and Megan Konar*
Agricultural virtual water flows within the United States (doi 10.1002/2014WR015919)
- 987** *M.-H. Le, S. Cordier, C. Lucas, and O. Cerdan*
A faster numerical scheme for a coupled system modeling soil erosion and sediment transport (doi 10.1002/2014WR015690)
- 1006** *Saoirse R. Tracy, Keith R. Daly, Craig J. Sturrock, Neil M. J. Crout, Sacha J. Mooney, and Tiina Roose*
Three-dimensional quantification of soil hydraulic properties using X-ray Computed Tomography and image-based modeling (doi 10.1002/2014WR016020)
- 1023** *Timothy D. Scheibe, William A. Perkins, Marshall C. Richmond, Matthew I. McKinley, Pedro D. J. Romero-Gomez, Mart Oostrom, Thomas W. Wietsma, John A. Serkowski, and John M. Zachara*
Pore-scale and multiscale numerical simulation of flow and transport in a laboratory-scale column (doi 10.1002/2014WR015959)

- 1036** *Jorge A. Ramirez, Andy J. Baird, Tom J. Coulthard, and J. Michael Waddington*
Testing a simple model of gas bubble dynamics in porous media (doi 10.1002/2014WR015898)
- 1050** *L. Josset, D. Ginsbourger, and I. Lunati*
Functional error modeling for uncertainty quantification in hydrogeology (doi 10.1002/2014WR016028)
- 1069** *Ning Ma, Yinsheng Zhang, Jozsef Szilagyi, Yanhong Guo, Jianqing Zhai, and Haifeng Gao*
Evaluating the complementary relationship of evapotranspiration in the alpine steppe of the Tibetan Plateau (doi 10.1002/2014WR015493)
- 1084** *Chenming Zhang, Ling Li, and David Lockington*
A physically based surface resistance model for evaporation from bare soils (doi 10.1002/2014WR015490)
- 1112** *Marina Dudley-Southern and Andrew Binley*
Temporal responses of groundwater-surface water exchange to successive storm events (doi 10.1002/2014WR016623)
- 1127** *Omer Yetemen, Erkan Istanbuluoglu, J. Homero Flores-Cervantes, Enrique R. Vivoni, and Rafael L. Bras*
Ecohydrologic role of solar radiation on landscape evolution (doi 10.1002/2014WR016169)
- 1158** *Aditi S. Bhaskar, Claire Welty, Reed M. Maxwell, and Andrew J. Miller*
Untangling the effects of urban development on subsurface storage in Baltimore (doi 10.1002/2014WR016039)
- 1182** *Yuqiong Liu, Christa D. Peters-Lidard, Sujay V. Kumar, Kristi R. Arsenault, and David M. Mocko*
Blending satellite-based snow depth products with in situ observations for streamflow predictions in the Upper Colorado River Basin (doi 10.1002/2014WR016606)
- 1203** *Susan E. Dickerson-Lange, James A. Lutz, Kael A. Martin, Mark S. Raleigh, Rolf Gersonde, and Jessica D. Lundquist*
Evaluating observational methods to quantify snow duration under diverse forest canopies (doi 10.1002/2014WR015744)
- 1225** *Julian Koch, Karsten Høgh Jensen, and Simon Stisen*
Toward a true spatial model evaluation in distributed hydrological modeling: Kappa statistics, Fuzzy theory, and EOF-analysis benchmarked by the human perception and evaluated against a modeling case study (doi 10.1002/2014WR016607)
- 1247** *R. O. Tinoco, E. B. Goldstein, and G. Coco*
A data-driven approach to develop physically sound predictors: Application to depth-averaged velocities on flows through submerged arrays of rigid cylinders (doi 10.1002/2014WR016380)
- 1264** *Ryan D. Swanson, Andrew Binley, Kristina Keating, Samantha France, Gordon Osterman, Frederick D. Day-Lewis, and Kamini Singha*
Anomalous solute transport in saturated porous media: Relating transport model parameters to electrical and nuclear magnetic resonance properties (doi 10.1002/2014WR015284)
- 1284** *C. Delavau, K. P. Chun, T. Stednyk, S. J. Birks, and J. M. Welker*
North American precipitation isotope ($\delta^{18}\text{O}$) zones revealed in time series modeling across Canada and northern United States (doi 10.1002/2014WR015687)
- 1300** *Gonzalo Sapriza-Azuri, Jorge Jódar, Vicente Navarro, Luit Jan Slooten, Jesús Carrera, and Hoshin V. Gupta*
Impacts of rainfall spatial variability on hydrogeological response (doi 10.1002/2014WR016168)
- 1315** *Bahman Esfandiari, Giovanni Porta, Simona Perotto, and Alberto Guadagnini*
Impact of space-time mesh adaptation on solute transport modeling in porous media (doi 10.1002/2014WR016569)

Review Article

- 1333** *Lucy A. Rose, Stephen D. Sebestyen, Emily M. Elliott, and Keisuke Koba*
Drivers of atmospheric nitrate processing and export in forested catchments (doi 10.1002/2014WR015716)

Technical Reports: Data

- 1353** *A. Bellin, D. Tonina, and A. Marzadri*
Breakthrough curve moments scaling in hyporheic exchange (doi 10.1002/2014WR016559)

Technical Reports: Methods

- 1359** *Michal Snehota, Vladimira Jelinkova, Martina Sobotkova, Jan Sacha, Peter Vontobel, and Jan Hovind*
Water and entrapped air redistribution in heterogeneous sand sample: Quantitative neutron imaging of the process (doi 10.1002/2014WR015432)

Comment and Reply

- 1372** *Paola Passalacqua and Efi Foufoula-Georgiou*
Comment on “Objective extraction of channel heads from high-resolution topographic data” by Fiona J. Clubb et al. (doi 10.1002/2014WR016412)
- 1377** *Fiona Clubb, Simon Mudd, and David Milodowski*
Reply to comment by P. Passalacqua and E. Foufoula-Georgiou on “Objective extraction of channel heads from high-resolution topographic data” (doi 10.1002/2014WR016603)
