

INHALTSVERZEICHNIS

ABSTRACTS

The genetic basis of toxicity from fluoropyrimidine-based chemotherapy: Epistatic effects and novel risk variants in carboxylesterase 1. AMSTUTZ, Ursula	4
The hyporeactivity of salivary cortisol at stress test (TSST-C) in children with internalizing or externalizing disorders is contrastively associated with α -amylase BAE, Yoon Ju	5
Mesangial TEM1 - A promising therapeutic target for diabetic nephropathy BIEMANN, Ronald	8
Virtuelle Plättchen – von der Simulation zur Realität BIRSCHMANN, Ingvild	9
Identification of tumor associated glycans of serum glycoproteins as potential biomarker for diagnosis of gynecologic malignancies. BISKUP, Karina	12
Heat shock proteins regulate protein quality control in diabetes BRUNE, Maik	13
The endothelial receptor Robo4 protects from islet inflammation during MLDS-Induced Diabetes in Mice CHATZIGEORGIU, Antonios	14
Lipidapherese als mögliche Intervention bei Präeklampsie CONTINI, Christine	15
Endothelial Notch signaling promotes metastasis FISCHER, Andreas	16
Zelluläre Biomarker für Diagnose und Risikostratifizierung bei Sepsis FREY, Oliver	17
Quantitative steroid analysis in body fluids and hair: One method to rule them all GAUDL, Alexander	18
Comprehensive molecular profiling in acute aortic dissection: seeking diagnostic biomarkers GAWINECKA, Joanna	19

Identifizierung von Mechanismen der Terminierung TNF-induzierter Signalübertragung: systemische Analyse des Phosphoproteoms. HUBER, René	20
Reversal of Telomeric Phenotype in Hutchinson-Gilford Progeria Fibroblasts by Human Telomerase JÄGER, Kathrin	22
Aufklärung der pathobiochemischen Grundlagen für erbliche Axonopathien: Generierung und Analyse von genetischen Mausmodellen JAHIC, Amir	23
In silico modeling of the dynamics of low density lipoprotein composition via a single plasma sample JANSEN, Martin	24
Lipid profiling of mitochondria: from workflow optimization to pathophysiological application KAPPLER, Lisa	25
Metabolic profiling in heart transplant patients for identification of biomarkers in immunosuppressive drug response LESCHE, Dorothea	27
Specific inhibition of complement activation significantly ameliorates autoimmune blistering disease in mice MIHAI, Sidonia	28
HERNA1 eRNA drives a myocardial – specific HIF gene expression program and heart disease MIRTSCHINK, Peter	30
Del-1 is a critical component of the hematopoietic stem cell niche that regulates steady-state and emergency myelopoiesis MITROULIS, Ioannis	31
Cardiac Troponin: precise guideline – precise clinical decisions? PETERSMANN, Astrid	32
The relation of uremia-induced inflammasome activation and K ⁺ dyshomeostasis RÖNICKE, Raik	33

INHALTSVERZEICHNIS

Predictive Modeling of Inpatient Mortality SCHÜTZ, Narayan	34
Hepatitis E: Much ado about nothing or a laboratory-underestimated risk? VOLLMER, Tanja	35
Liquid profiling for tumor load monitoring in blood plasma using personalized droplet digital PCR assays detecting tumor-specific chromosomal rearrangements WINTER, Christof	36
