Gefäßchirurgie / Chirurgie vasculaire	Was „the maximum the optimum“ in the treatment of a traumatic renal artery occlusion in an 11 year-old boy?	FM1.1
	Treatment of abdominal aortic aneurysm with InCraft stent-graft – early results	FM1.2
	Early multicentric experience with the Nellix Endovascular Aneurysm Sealing system for abdominal aortic aneurysm repair.	FM1.3
	Chimney graft technique associated with EVAS is an effective therapy for complex abdominal aortic aneurysms.	FM1.4
	Endovenectomy of the femoral veins for post-thrombotic syndrome with venous claudication	FM1.5
	Extra-Design (Jotec) branched and fenestrated endografts are a valid option for the treatment of complex aortic aneurysmal disease.	FM1.6
<hr/>		
Interventionelle Radiologie/ Radiologie interventionnelle	Endovascular stent reconstruction of a chronic total occlusion of the inferior vena cava using bidirectional wire access and a balloon puncture by a re-entry device	FM2.1
	Perkutane Valvuloplastie: Vergleich zweier unterschiedlicher Hyaluronsäurepräparate	FM2.2
	Untersuchungen zur Wirksamkeit eines neuen Verödungsschaumes mit einer autologen Biomatrix im Vergleich zu endovenösen Lasern	FM2.3
	Rivaroxaban versus fondaparinux for thromboprophylaxis after endovenous Laser ablation	FM2.4
	An important role of VEGF-C in promoting lymphedema development	FM2.5
	Belastungsinduzierter Vasospasmus bei Endofibrose der Iliacalarterien	FM2.6
<hr/>		
Angiologie	Use of fondaparinux in suspected acute heparin-induced thrombocytopenia (HIT) – results from the GerHIT multicentre registry study	FM3.1
	Ultrasound-assisted versus conventional catheter-directed thrombolysis for acute ilio-femoral deep vein thrombosis: 1-year clinical follow-up data of a randomized-controlled trial	FM3.2
	Safety of multidetector computed tomography pulmonary angiography to exclude pulmonary embolism in patients with a likely pretest clinical probability	FM3.3
	Supervised exercise training in patients with peripheral arterial disease is associated with an increase of vascular stress and profunda femoral artery diameter	FM3.4

Effects of five versus three times a week walking exercise on walking capacity in experimental peripheral artery disease. **FM3.5**

Pharmacomechanical or ultrasound-assisted thrombolysis, balloon angioplasty and provisional surgical decompression for upper extremity deep vein thrombosis due to thoracic outlet syndrome **FM3.6**

Poster

Paclitaxel-coated angioplasty for the treatment of long occlusion in superficial femoral arteries due to giant cell arteritis **P67**

In vivo regulation of lymphatic vessel function by the autonomic nervous system **P68**

Contrast enhanced ultrasound for (mis-)diagnosis of vascular malformations **P69**

Large vessel involvement in a patient with Behçet's disease **P70**

Endovascular treatment of below-the-knee lesions in patients with critical limb ischemia is the procedure of choice. **P71**

Folienkompressionsverband – eine Modalität mit Vorteilen für die Schaumverödung großer oberflächlicher Varizen **P72**

Klebertechniken für Venen – Limitierungen und Fortschritte **P73**

Percutaneous thrombin-injection of radial pseudo aneurysm supported with retrograde flow through proximal arterial compression **P74**

Die Ursache der venösen Insuffizienz: Sonographische Hinweise auf Mikroinflammationen infolge von zellulären Aggregaten als Substrat von Klappenschädigungen **P75**

Heading Towards an Artificial Lymphatic Vessel to Treat Lymphedema **P76**

A case of antiphospholipid syndrome **P77**

Antibody-mediated blockade of ALCAM reduces lymphangiogenesis but only marginally affects T cell-mediated inflammation **P78**

A novel method for dynamic assessment of lymphatic function by near-infrared monitoring of a peripheral blood vessel **P79**

Vacuum assisted closure therapy is not superior to rinse and suction drainage in patients with aortofemoral graft infection **P80**

Identification of new genes involved in leukocyte migration through afferent lymphatic vessels **P81**
