

# Archives of Phytopathology and Plant Protection

Volume 49 Numbers 13–16 August–October 2016

---

## CONTENTS

### Articles

- 325 Antibacterial properties and major bioactive components of *Mentha piperita* essential oils against bacterial fruit blotch of watermelon  
*Okhee Choi, Su Kyung Cho, Junheon Kim, Chung Gyoo Park and Jinwoo Kim*
- 335 Seasonal incidence of aphid, *Amphorophora ampullata* Bukton (Homoptera: Aphididae) on fern, *Hypolepis polypodioides* (Blume) Hook (Hypolepidaceae) from Western Himalaya  
*S. G. Eswara Reddy and Alka Kumari*
- 343 A putative endophytic *Bacillus cereus* str. S42 from *Nicotiana glauca* for biocontrol of Fusarium wilt disease in tomato and gas chromatography-mass spectrometry analysis of its chloroform extract  
*Rania Aydi Ben Abdallah, Ahlem Nefzi, Hayfa Jabnoun-Khiareddine, Chokri Messaoud, Catalina Stedel, Kalliope K. Papadopoulou, Sonia Mokni-Tlili and Mejda Daami-Remadi*
- 362 Nanosilica and jasmonic acid as alternative methods for control *Tuta absoluta* (Meyrick) in tomato crop under field conditions  
*Hany Ahmed Fouad, Hosam Mohamed Khalil Hammam El-Gepaly and Osama Ahmed Fouad*
- 371 Phenotypic and molecular analyses of leaf rust resistance in some Iranian wheat genotypes  
*Ali Aliakbari Sadeghabad, Ali Dadkhodaie, Bahram Heidari, Hooman Razi and Reza Mostowfizadeh-Ghalamfarsa*
- 386 Performances of improved cassava (*Manihot esculenta* Crantz) cultivars against root rot disease and yield in cassava-maize intercropping systems under natural infection  
*Sola Olawale Awoyemi, Clement Gboyega Afolabi, Akinola Rasheed Popoola, Joy Nwakaego Odedina and Sunday Ojo Adigbo*
- 402 Effects of rye and triticale seed proteins on *Leptinotarsa decemlineata* (Say) digestive  $\alpha$ -amylase and protease and some biological parameters  
*Shabnam Ashouri, Reza Farshbaf Pourabad, Alireza Bandani and Soheyla Fatehi*
