

## CONTENTS

Volume 13 Number 6 2016

Biological Degumming of Silk Fabrics with Proteolytic Enzymes <i>Juheon Kim, MiYeon Kwon, and Suyeon Kim</i>	629
Critical Parameters Affecting Mechanical Behavior of Natural Fiber Reinforced Plastics <i>A. V. Singhal, K. Debnath, I. Singh, and B. S. S. Daniel</i>	640
Integrated Mechanical-Economic-Environmental Quality of Performance for Natural Fibers for Polymeric-Based Composite Materials <i>Faris M. AL-Oqla, S. M. Sapuan, and M. Jawaid</i>	651
Current Progress, Trends and Challenges in the Application of Biofiber Composites by Automotive Industry <i>Dilpreet S. Bajwa and Sujal Bhattacharjee</i>	660
Ricinoleic Acid Encapsulation into Ethyl Cellulose Electrospun Fibers <i>Ahmed A. Nada, Rihab A. Abdelazeem, Ahmed H. Elghandour, and Nabil Y. Abou-Zeid</i>	670
Tensile Behavior of the Knots for Spun Yarns of Different Flax Types <i>Donatas Petrulis and Salvinija Petrulyte</i>	682
Evaluation of <i>Furcraea Andina</i> Fibers as Bacterial Support for Biological Denitrification <i>J. J. Gallardo-Rodríguez, A. Ríos-Rivera, and D. Felipe-Hernández</i>	691
Effect of NaOH Treatment on Properties of <i>Phoenix Sp.</i> Fiber <i>G. Rajeshkumar, V. Hariharan, and T. Scalici</i>	702
Thermal Comfort of Woolen Fabrics Depending on Physical Properties <i>Vedat Dal, Mustafa Atmaca, Zehra Yildiz, Nuray Oz Ceviz, and Lubos Hes</i>	714
Energy Absorption Capability of Cotton Fiber/Epoxy Composite Square and Rectangular Tubes <i>Othman Laban and Elsadig Mahdi</i>	726
Dipping Modification with Nano-CaCO <sub>3</sub> to Improve Tensile Properties of Individual Bamboo Fiber for Developing Bamboo-Plastic Composite <i>Cuicui Wang, Wei Song, Haitao Cheng, Xuefei Yu, Wenyan Li, and Shuangbao Zhang</i>	737
Dyeing Recipe Optimization for Eco-Friendly Dyeing and Mechanical Property Analysis of Eco-Friendly Dyed Cotton Fabric: Better Fixation, Strength, and Color Yield by Biodegradable Salts <i>Hafeezullah Memon, Awais Khatri, Nazakat Ali, and Samiullah Memon</i>	749
Extraction and Performance Characterization of the <i>Carexmeyeriana</i> Fiber <i>Chunhong Wang, Suyue Bai, Xinmin Yue, and Zilong Ren</i>	759
