

Soil & Plant Science

CONTENTS

REVIEW ARTICLES

- 1 Combining X-ray computed tomography with relevant techniques for analyzing soil-root dynamics – an overview
Hanping Mao, Francis Kumi, Qingli Li and Luhua Han
- 20 Optimal control of maize foliar diseases using the plants population dynamics
Obiora Cornelius Collins and Kevin Jan Duffy

ORIGINAL ARTICLES

- 27 Effects of genotype and weed control on the nutrient composition of winter spelt (*Triticum aestivum* ssp. *spelta* L.) and common wheat (*Triticum aestivum* ssp. *vulgare*)
Wioletta Biel, Anna Jaroszewska, Sławomir Stankowski, Józef Sadkiewicz and Paulina Boško
- 36 Soil sustainability changes in organic crop rotations with diverse crop species and the share of legumes
Dalia Feiziene, Virginijus Feiza, Virmantas Povilaitis, Agne Putramentaite, Daiva Janauskaite, Vytautas Seibutis and Jonas Slepetyš
- 52 Screening of Tanzanian sweet potato germplasm for yield and related traits and resistance to sweet potato virus disease
Stephan Ngailo, Hussein Shimelis, Julia Sibiya and Kiddo Mtunda
- 67 Changes of soil ecological stoichiometric ratios under different land uses in a small catchment of subtropical China
Ming Liu, Zhongpei Li and Taolin Zhang
- 75 Population dynamics and nitrogen allocation of *Sonchus arvensis* L. in relation to initial root size
Saghi Anbari, Anneli Lundkvist, Johannes Forkman and Theo Verwijst
- 85 Cover cropping influences physico-chemical soil properties under direct drilling soybean
Elżbieta Harasim, Dorota Gawęda, Marian Wesółowski, Cezary Kwiatkowski and Magdalena Gocół
