

# JOURNAL OF THE AMERICAN SOCIETY FOR HORTICULTURAL SCIENCE

VOL. 141, NO. 1

CONTENTS

JANUARY 2016

- |    |                                                                                                                                                                                                                                                                                                                                           |    |                                                                                                                                                                                 |
|----|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 3  | Total Phenolic Content and Associated Phenotypic Traits in a Diverse Collection of Snap Bean Cultivars<br>Adrienne E. Kleintop, James R. Myers, Dimas Echeverria, Henry J. Thompson, and Mark A. Brick                                                                                                                                    | 45 | Factors Affecting Mechanical Properties of the Skin of Sweet Cherry Fruit<br>Martin Brüggewirth and Moritz Knoche                                                               |
| 12 | Responses of Spinach to Salinity and Nutrient Deficiency in Growth, Physiology, and Nutritional Value<br>Chenping Xu and Beiquan Mou                                                                                                                                                                                                      | 54 | Omacitrus: Development of Genetically Modified Anthocyanin-expressing Citrus with Both Ornamental and Fresh Fruit Potential<br>Manjul Dutt, Daniel Stanton, and Jude W. Grosser |
| 22 | Freezing Tolerance Attributes during Spring Deacclimation for Three Asparagus Cultivars with Varying Adaptation to Southern Ontario<br>Mahmoud Panjtandoust and David J. Wolyn                                                                                                                                                            | 62 | Single Nucleotide Polymorphisms and Indel Markers from the Transcriptome of Garlic<br>Michael J. Havey and Yul-Kyun Ahn                                                         |
| 34 | Interspecific Hybridization between Eggplant and Wild Relatives from Different Genepools<br>Mariola Plazas, Santiago Vilanova, Pietro Gramazio, Adrián Rodríguez-Burruezo, Ana Fita, Francisco J. Herraiz, Rajakapasha Ranil, Ramya Fonseka, Lahiru Niran, Hemal Fonseka, Brice Kouassi, Abou Kouassi, Auguste Kouassi, and Jaime Prohens | 66 | Leaf Trimming and High Temperature Regulation of Phytohormones and Polyamines in Creeping Bentgrass Leaves<br>Sanalkumar Krishnan, Yingmei Ma, and Emily Merewitz               |
|    |                                                                                                                                                                                                                                                                                                                                           | 76 | Physiological Effects of $\gamma$ -Aminobutyric Acid Application on Improving Heat and Drought Tolerance in Creeping Bentgrass<br>Zhou Li, Yan Peng, and Bingru Huang           |
|    |                                                                                                                                                                                                                                                                                                                                           | 85 | Leaf Protein Abundance Associated with Improved Drought Tolerance by Elevated Carbon Dioxide in Creeping Bentgrass<br>Patrick Burgess and Bingru Huang                          |
