

CONTENTS

Volume 79, January 2016

Research Articles

- 1 Volatile profile, nutritional value and secretory structures of the berry-like fruits of *Hypericum androsaemum* L
G. Caprioli, R. Iannarelli, K. Cianfaglione, D. Fiorini, C. Giuliani, D. Lucarini, F. Papa, G. Sagratini, S. Vittori, F. Maggi (Italy)
- 11 Formation of nanostructured colloidosomes using electrostatic deposition of solid lipid nanoparticles onto an oil droplet interface
H. Salminen, T. Helgason, B. Kristinsson, K. Kristbergsson, J. Weiss (Germany, Iceland)
- 19 Modeling the effect of natamycin, pine-resin and environmental factors on the growth and OTA production by *Aspergillus carbonarius* using response surface methodology
E.A. Kogkaki, P.I. Natskoulis, E.Z. Panagou (Greece)
- 29 Effect of the addition of palm stearin and storage temperatures on the thermal properties of glycerol monostearate-structured emulsions
F.C. Wang, C. Challacombe, A.G. Marangoni (Canada)
- 33 Effect of continuous ingestion of a beverage prepared with *Lactobacillus gasseri* CP2305 inactivated by heat treatment on the regulation of intestinal function
D. Sawada, T. Sugawara, Y. Ishida, K. Aihara, Y. Aoki, I. Takehara, K. Takano, S. Fujiwara (Japan)
- 40 Effects of high pressure processing (hydrostatic high pressure and ultra-high pressure homogenisation) on whey protein native state and susceptibility to tryptic hydrolysis at atmospheric pressure
C. Blayo, O. Vidcoq, F. Lazennec, E. Dumay (France)
- 54 Controlled accelerated oxidation of oleic acid using a DBD plasma: Determination of volatile oxidation compounds
J. Vandamme, A. Nikiforov, M. De Roose, C. Leys, L. De Cooman, J. Van Durme (Belgium)
- 64 Gel-like pea protein Pickering emulsions at pH 3.0 as a potential intestine-targeted and sustained-release delivery system for β -carotene
Y. Shao, C.-H. Tang (People's Republic of China)
- 73 Calculating the degradation kinetic parameters of thiamine by the isothermal version of the endpoints method
M. Peleg, M.D. Normand, T.R. Goulette (USA)
- 81 Free radical formation by *Lactobacillus acidophilus* NCFM is enhanced by antioxidants and decreased by catalase
A.B. Hougaard, H. Pindstrup, N. Arneborg, M.L. Andersen, L.H. Skibsted (Denmark)
- 88 Variability in resistance to Cold Atmospheric Plasma (CAP) and Ultraviolet light (UV) and multiple stress resistance analysis of pathogenic verocytotoxigenic *Escherichia coli* (VTEC)
M.A. Prieto-Calvo, M. López, M. Prieto, A. Alvarez-Ordóñez (Spain, Ireland)

(Continued on next page)

(Continued from previous page)

- 95** Structural characterization of β -carotene-incorporated nanovesicles produced with non-purified phospholipids
M. Michelon, R.A. Mantovani, R. Sinigaglia-Coimbra, L.G. de la Torre, R.L. Cunha (Brazil)
- 106** Study of the dynamic changes in the non-volatile chemical constituents of black tea during fermentation processing by a non-targeted metabolomics approach
J. Tan, W. Dai, M. Lu, H. Lv, L. Guo, Y. Zhang, Y. Zhu, Q. Peng, Z. Lin (PR China)
- 114** Unspecified duo-trio tests can be as powerful as the specified 2-AFC: Effects of instructions and familiarization procedures on cognitive decision strategies
H.-K. Shin, M.J. Hautus, H.-S. Lee (South Korea, New Zealand)
