Best paper awards for 2015	2
Original Articles	
Optimisation and validation of a high-throughput semi-quantitative solid-phase microextraction method for analysis of fermentation aroma compounds in metabolomic screening studies of wines <i>J. Haggerty, P.K. Bowyer, V. Jiranek and D.K. Taylor</i>	3
Determination of phenolic substances of seeds, skins and stems from white grape marc by near-infrared hyperspectral imaging <i>M.J. Jara-Palacios, F.J. Rodríguez-Pulido, D. Hernanz, M.L. Escudero-Gilete and F.J. Heredia</i>	11
A high-throughput UHPLC MS/MS method for evaluation of tartaric and malic acid concentration in individual grapevine berries <i>E.G. Higginson, N.D.R. Lloyd, O. Kravchuk, C.M. Ford and M.R. Thomas</i>	16
Effect of oxygen exposure during fermentation on volatile sulfur compounds in Shiraz wine and a comparison of strategies for remediation of reductive character <i>M.Z. Bekker, M.P. Day, H. Holt, E. Wilkes and P.A. Smith</i>	24
Use of fortified pied de cuve as an innovative method to start spontaneous alcoholic fermentation for red winemaking <i>G. Moschetti, O. Corona, R. Gaglio, M. Squadrito, A. Parrinello, L. Settanni, E. Barone and N. Francesca</i>	36
Fate of the glutathione released from inactive dry yeast preparations during the alcoholic fermentation of white musts <i>J.J. Rodríguez-Bencomo, I. Andújar-Ortiz, F. Sánchez-Patán, M.V. Moreno-Arribas and M.A. Pozo-Bayón</i>	46
Genetic correlations in grapevine and their effects on selection <i>E. Gonçalves, I. Carrasquinho, R. Almeida, V. Pedroso and A. Martins</i>	52
Future of winegrape growing regions in Europe <i>J.P. Tóth and Z. Végvári</i>	64
Projecting future winegrape yields using a combination of <i>Vitis vinifera</i> L. growth rings and soil moisture simulations, northern California, USA <i>J.T. Maxwell, D.L. Ficklin, G.L. Harley and G.V. Jones</i>	73
Vessel embolism and tyloses in early stages of Pierce's disease <i>A.G. Pérez-Donoso, J.J. Lenhof, K. Pinney and J.M. Labavitch</i>	81
Ultraviolet-B alleviates the uncoupling effect of elevated CO ₂ and increased temperature on grape berry (<i>Vitis vinifera</i> cv. Tempranillo) anthocyanin and sugar accumulation <i>J. Martínez-Lüscher, M. Sánchez-Díaz, S. Delrot, J. Aguirreolea, I. Pascual and E. Gomès</i>	87
Accumulation and partitioning of anthocyanins in two red grape cultivars under natural and reduced UV solar radiation <i>A. Fernandes de Oliveira and G. Nieddu</i>	96
Vine growth and physiological performance of two red grape cultivars under natural and reduced UV solar radiation <i>A. Fernandes de Oliveira and G. Nieddu</i>	105
Leaf carbohydrate metabolism in Malbec grapevines: combined effects of regulated deficit irrigation and crop load <i>S. Dayer, J.A. Prieto, E. Galat and J. Perez Peña</i>	115
Effects of irrigation and rootstock on <i>Vitis vinifera</i> (L.) cv. Shiraz berry composition and shrivel, and wine composition and wine score <i>R.M. Stevens, J.M. Pech, J. Taylor, P. Clingeleffer, R.R. Walker and P.R. Nicholas</i>	124
Root-zone management practices impact above and belowground growth in Cabernet Franc grapevines <i>M. Centinari, J.E. Vanden Heuvel, M. Goebel, M.S. Smith and T.L. Bauerle</i>	137
Differential fruitset between grapevine cultivars is related to differences in pollen viability and amine concentration in flowers <i>T. Baby, M. Gilliam, S.D. Tyerman and C. Collins</i>	149
