

Contents

- 1 **Perspectives on "Nest Construction and Function 2015"**
D. Charles Deeming

- 3 **The function of stones in nest building: the case of Black Wheatear (*Oenanthe leucura*) revisited**
Francisco Javier Aznar and Marta Ibáñez-Agulleiro

- 13 **Geographical effects on the mass and dimensions of finch (*Fringillidae*, *Passeriformes*) and thrush (*Turdidae*, *Passeriformes*) nests**
Lucia E. Biddle, Adrian M. Goodman and D. Charles Deeming

- 22 **Nest insulating capacity during incubation and after fledging are related**
Ángel Cruz, Elena Álvarez and Emilio Barba

- 28 **Comparison of two methods for determination of the insulation of passerine nest walls**
D. Charles Deeming and Liberty A. Gray

- 32 **Incubation attentiveness and nest insulatory values correlate in songbirds**
D. Charles Deeming and Liberty A. Gray

- 37 **Effects of nest characteristics on reproductive performance in Blue Tits *Cyanistes caeruleus* and Great Tits *Parus major***
Michał Gładalski, Mirosława Bańbura, Adam Kaliński, Marcin Markowski, Joanna Skwarska, Jarosław Wawrzyniak, Piotr Zieliński, Iwona Cyżewska and Jerzy Bańbura

- 44 **Evolutionary mechanisms maintaining nest construction in avian clades**
Gavin M. Leighton

- 52 **Experimentally reduced nest-building costs result in higher provisioning rates but not increased offspring fitness in Blue Tits**
Mark C. Mainwaring and Ian R. Hartley

- 58 **Facultative nest modification by Rock Wrens (*Salpinctes obsoletus*)**
Nathaniel Warning and Lauryn Benedict

- 66 **Avian News**
