

Contents

- A comparison of soil quality and yield parameters under organic and conventional vineyard systems in Mediterranean conditions (West Turkey)
N. Okur, H.H. Kayikcioglu, F. Ates and B. Yagmur 73
- On-farm produced microbial soil inoculant effects on bread wheat (*Triticum aestivum*) production
Aaron C. Englander, David D. Douds Jr and Ellen B. Mallory 85
- Influences of two-year red clover-grass ley management on nitrogen economy and following wheat performance
H. Moyo, W.P. Davies, N.D. Cannon and J.S. Conway 98
- Quantifying annual variations in field scale element flows and balances is essential for sustainable nutrient management in farming systems
Helena Bengtsson, Christine A. Watson, Simon Jonsson and Ingrid Öborn 110
- Sewage sludge biochar: effects on soil fertility and growth of radish
A. A. T. C. Sousa and C. C. Figueiredo 127
- The response of safflower seed quality characteristics to organic and chemical fertilisation
M. Hajghani, A. Ghalavand, S.A.M. Modarres-Sanavy and A. Asadipour 139
