

Journal of *Arid Environments*

Volume 128 May 2016

Contents

BOTANY

- Wang, X., Xiao, H., Cheng, Y. & Ren, J. Leaf epidermal water-absorbing scales and their absorption of unsaturated atmospheric water in *Reaumuria soongorica*, a desert plant from the northwest arid region of China. 17
- Bhatt, A., Santo, A. & Gallacher, D. Seed mucilage effect on water uptake and germination in five species from the hyper-arid Arabian desert. 73
- MacLaren, C.A. Climate change drives decline of *Juniperus seravschanica* in Oman 91

ZOOLOGY

- Liu, J.-L., Li, F.-R., Sun, T.-S., Ma, L.-F., Liu, L.-L. & Yang, K. Interactive effects of vegetation and soil determine the composition and diversity of carabid and tenebrionid functional groups in an arid ecosystem 80

CLIMATE

- Bennett, M., New, M., Marino, J. & Sillero-Zubiri, C. Climate complexity in the Central Andes: A study case on empirically-based local variations in the Dry Puna 40

GRAZING

- Scocco, P., Piermarteri, K., Malfatti, A., Tardella, F.M. & Catorci, A. Increase of drought stress negatively affects the sustainability of extensive sheep farming in sub-Mediterranean climate. 50
- Randriamalala, J.R., Radosy, H.O., Razanaka, S., Randriambanona, H. & Hervé, D. Effects of goat grazing and woody charcoal production on xerophytic thickets of southwestern Madagascar 65

SHORT COMMUNICATIONS

- Almirón, M.G., Martínez Carretero, E.E., Navas, M.D. & Pantano, M.V. Morphology and mechanical properties of junctions: Implications on the success of clonal spread of cacti 8
- Asaka, J.O. & Smucker, T.A. Assessing the role of mobile phone communication in drought-related mobility patterns of Samburu pastoralists. 12
- Hatchett, B.J., Koračin, D., Mejía, J.F. & Boyle, D.P. Assimilating urban heat island effects into climate projections 59

RESTORATION

- Derak, M., Taiquib, L., Aledoc, A. & Cortina, J. Similarities in stakeholder identification of restoration targets in a semiarid area. 30

SOIL

- Yu, J., Guan, P., Zhang, X., Ma, N. & Steinberger, Y. Biocrusts beneath replanted shrubs account for the enrichment of macro and micronutrients in semi-arid sandy land. 1
