

NEW ZEALAND JOURNAL OF
AGRICULTURAL
RESEARCH

Volume 59 Number 2 June 2016

Research articles

The plant growth regulator, trinexapac-ethyl, increases seed yield in annual ryegrass (*Lolium multiflorum* Lam.)

JAK Trethewey, MP Rolston, BL McCloy and RJ Chynoweth 113

Plant N uptake in the periphery of a bovine urine patch: determining the 'effective area'

LE Buckthought, TJ Clough, KC Cameron, HJ Di and MA Shepherd 122

Effects of irrigation intensity on preferential solute transport in a stony soil

R Cichota, FM Kelliher, SM Thomas, G Clemens, PM Fraser and S Carrick 141

Breed and heterosis effects for milk yield traits at different production levels, lactation number and milking frequencies

F Lembeye, N López-Villalobos, JL Burke and SR Davis 156

Effectiveness of the nitrification inhibitor dicyandiamide and biochar to reduce nitrous oxide emissions

G Treweek, HJ Di, KC Cameron and A Podolyan 165

Review article

Dairy and beef breed effects on beef yield, beef quality and profitability: a review

MD Bown, PD Muir and BC Thomson 174

Short communications

Cadmium losses from a New Zealand organic soil

CW Gray and RW McDowell 185

Nitrate leaching losses from lysimeters simulating winter grazing of fodder beet by dairy cows

BJ Malcolm, KC Cameron, GR Edwards, HJ Di, JM de Ruiter and DE Dalley 194
