**Research Articles**

Predicting species richness and distribution ranges of centipedes at the northern edge of Europe <i>E. Georgopoulou, P. Djursvoll and S.M. Simaiakis</i> .....	1
Responses of tropical fruit bats to monoculture and polyculture farming in oil palm smallholdings <i>M. Syafiq, A.R. Nur Atiqah, A. Ghazali, S. Asmah, M.S. Yahya, N. Aziz, C.L. Puan and B. Azhar</i> .....	11
Climate and landscape explain richness patterns depending on the type of species' distribution data <i>M.A. Tsianou, N. Koutsias, A.D. Mazaris and A.S. Kallimanis</i> .....	19
Caterpillar biomass depends on temperature and precipitation, but does not affect bird reproduction <i>E.M. Schöll, J. Ohm, K.F. Hoffmann and S.M. Hille</i> .....	28
Plant functional traits and diversity in sand dune ecosystems across different biogeographic regions <i>P. Mahdavi and E. Bergmeier</i> .....	37
Two invasive acacia species secure generalist pollinators in invaded communities <i>D. Montesinos, S. Castro and S. Rodríguez-Echeverría</i> .....	46
