

TRENDS IN FOOD SCIENCE & TECHNOLOGY

REVIEWS

- Food-derived dipeptidyl-peptidase IV inhibitors as a potential approach for glycemic regulation – Current knowledge and future research considerations** by Isabelle M.E. Lacroix and Eunice C.Y. Li-Chan 1
- Lactic acid bacteria as sensory biomodulators for fermented cereal-based beverages** by Lorenzo C. Peyer, Emanuele Zannini and Elke K. Arendt 17
- Post-processing of fermented milk to stirred products: Reviewing the effects on gel structure** by Aryama Mookoonlall, Stefan Nöbel and Jörg Hinrichs 26
- Flavor of lactic acid fermented malt based beverages: Current status and perspectives** by Sorelle Nsogning Dongmo, Susanne Procopio, Bertram Sacher and Thomas Becker 37
- Prospects of *Poria cocos* polysaccharides: Isolation process, structural features and bioactivities** by Xuejing Jia, Lishuai Ma, Peng Li, Meiwan Chen and Chengwei He 52
- Electrically-induced transport phenomena in EHD drying – A review** by Alex Martynenko and Tadeusz Kudra 63
- Seaweed as a protein source for mono-gastric livestock** by Alex R. Angell, Simon F. Angell, Rocky de Nys and Nicholas A. Paul 74

(contents continued)

Biological activities and chemical constituents of <i>Araucaria angustifolia</i>: An effort to recover a species threatened by extinction by Rosane M. Peralta, Eloá A. Koehnlein, Roselene F. Oliveira, Vanesa G. Correa, Rubia C.G. Corrêa, Leonardo Bertonha, Adelar Bracht and Isabel C.F.R. Ferreira	85
Environmental impacts of the meat chain – Current status and future perspectives by Ilija Djekic and Igor Tomasevic	94
Determination of chemical hazards in foods using surface-enhanced Raman spectroscopy coupled with advanced separation techniques by Wen Liao and Xiaonan Lu	103
Nanocarriers based delivery of nutraceuticals for cancer prevention and treatment: A review of recent research developments by Divya Arora and Sundeep Jaglan	114
Recent advances in D-allulose: Physiological functionalities, applications, and biological production by Wenli Zhang, Shuhuai Yu, Tao Zhang, Bo Jiang and Wanmeng Mu	127
Particle formation and gelation of soymilk: Effect of heat by Xingyun Peng, Chengang Ren and Shuntang Guo	138
Macadamia oil extraction methods and uses for the defatted meal byproduct by Sandra L.B. Navarro and Christianne E.C. Rodrigues	148
Nanomaterials for products and application in agriculture, feed and food by Ruud J.B. Peters, Hans Bouwmeester, Stefania Gottardo, Valeria Amenta, Maria Arena, Puck Brandhoff, Hans J.P. Marvin, Agnieszka Mech, Filipa Botelho Moniz, Laia Quiros Pseudo, Hubert Rauscher, Reinhilde Schoonjans, Anna K. Undas, Maria Vittoria Vettori, Stefan Weigel and Karin Aschberger	155
The triple defensive barrier of phenolic compounds against the lipid oxidation-induced damage in food products by Rosario Zamora and Francisco J. Hidalgo	165
Novel approaches in improving the quality and safety aspects of processed meat products through high pressure processing technology - A review by Desugari Hygreeva and M.C. Pandey	175
Biological effects induced by estrogenic activity of lignans by Ryoiti Kiyama	186
COMMENTARIES	
Development of novel functional ingredients: Need for testing systems and solutions with <i>Caenorhabditis elegans</i> by Daniel R. Calvo, Patricia Martorell, Salvador Genovés and Luis Gosálbez	197
You are what your parents ate: A Darwinian perspective on the inheritance of food effects by Zhengrong Wang, Qinglian Wang and Yongsheng Liu	204
The effect of strategic partnership on innovation: An empirical analysis by Rosa Caiazza and John Stanton	208
Early detection of food pathogens and food spoilage microorganisms: Application of metabolomics by Farhana R. Pinu	213
Regulating food nanotechnologies in the European Union: Open issues and political challenges by Valeria Sodano, Maria Teresa Gorgitano, Maria Quaglietta and Fabio Verneau	216
