

Contents

Editorial

- Plant diversity effects on soil microorganisms: Spatial and temporal heterogeneity of plant inputs increase soil biodiversity**
Nico Eisenhauer _____ 175

Original articles

- Molecular community analysis of arbuscular mycorrhizal fungi—Contributions of PCR primer and host plant selectivity to the detected community profiles**
Veronika Řezáčová, Milan Gryndler, Petra Bukovská, Petr Šmilauer, Jan Jansa _____ 179
- Assimilation of plant-derived freshly fixed carbon by soil collembolans: Not only via roots?**
Anton M. Potapov, Anton A. Goncharov, Sergey M. Tsurikov, Thomas Tully, Alexei V. Tiunov _____ 189
- Miscanthus* biochar promotes growth of spring barley and shifts bacterial community structures including phosphorus and sulfur mobilizing bacteria**
A. Fox, J. Gahan, I. Ikoyi, W. Kwapinski, O. O'Sullivan, P.D. Cotter, A Schmalenberger _____ 195
- Testing life history and trait-based predictions of AM fungal community assembly**
Miranda M. Hart, P. Dylan Zaitsoff, Mieke van der Heyde, Jason Pither _____ 203

Review article

- The impact of crop rotation on soil microbial diversity: A meta-analysis**
Zander Samuel Venter, Karin Jacobs, Heidi-Jayne Hawkins _____ 215

Short Communications

- Differential utilization of root-derived carbon among collembolan species**
Saori Fujii, Akira S. Mori, Yuji Kominami, Yusuke Tawa, Yoshiyuki Inagaki, Satoru Takanashi, Hiroshi Takeda _____ 225
- Microbial turnover of above and belowground litter components in shrublands**
Venkata S.S.R. Marella, Paul W. Hill, Davey L. Jones, Paula Roberts _____ 229
