

Fundamental and Applied Limnology
formerly: Archiv für Hydrobiologie
Contents of Vol. 189 No. 1, 2016

Shi, X., Li, S., Wang, X., Liu, M. & Kong, F.: CO ₂ alters picophytoplankton community structure in freshwater ecosystems	1–10
Houben, A. J., French, T. D., Kokelj, S. V., Wang, X., Smol, J. P. & Blais, J. M.: The impacts of permafrost thaw slump events on limnological variables in upland tundra lakes, Mackenzie Delta region	11–35
Logez, M., Roy, R., Tissot, L. & Argillier, C.: Effects of water-level fluctuations on the environmental characteristics and fish-environment relationships in the littoral zone of a reservoir.	37–49
Taş, B.: Phytoplankton community and ecological state of a high-mountain lake within an Important Natural Area (Eastern Black Sea, Turkey)	51–61
Butorina, L. G.: Embryonic diapause of a freshwater crustacean <i>Polyphemus pediculus</i> (Cladocera, Onychopoda)	63–81
