Contents

Bee Management

Protocol for the *in vitro* rearing of honey bee (*Apis mellifera* L.) workers

Daniel R Schmehl, Hudson V V Tomé, Ashley N Mortensen, Gustavo Ferreira Martins and James D Ellis 113

Productivity and longevity of honey bee queens inseminated with freshly collected and diluted semen

Dariusz Gerula, Paweł Węgrzynowicz, Beata Panasiuk, Małgorzata Bieńkowska and Wojciech Skowronek 130

Hive Product Science

Apini and Meliponini foraging activities influence the phenolic content of different types of Malaysian honey

Norjihada Izzah Ismail, Mohammed Rafiq Abdul Kadir, Nasrul Humaimi Mahmood, Om Prakash Singh, Nida Iqbal and Razauden Mohamed Zulkifli 137

Physicochemical and antioxidant properties of honey from *Scaptotrigona mexicana* bee

Maribel Jimenez, Cesar Ignacio Beristain, Ebner Azuara, María Remedios Mendoza and Luz Alicia Pascual 151

The nutritional and bioactive aptitude of bee pollen for a solid-state fermentation process

Claudia Salazar-González and Consuelo Díaz-Moreno 161

Pathology and Parasitology

A three-year survey of honey bee viruses in Lithuania

Laima Blažytė-Čereškienė, Vesta Skrodenytė-Arbačiauskienė, Sandra Radžiutė, Rasa Čepulytė-Rakauskienė, Violeta Apšegaitė and Vincas Būda 176

Detection of begomovirus in the stingless bee *Trigona fuscipennis* visiting *Jatropha curcas* in the South of Mexico

Rodolfo Torres-deLosSantos, Miguel Salvador-Figueroa, Ervin H Gallegos-Gómez, Leonardo D. Arévalo-Monterrubio, Manuel Rincón-Rabanales and Julieta Grajales-Conesa 185

Infestation of *Apis mellifera* colonies by *Megaselia scalaris* (Loew, 1866) in Abruzzo and Molise regions, central-southern Italy

Luciano Ricchiuti, Marsia Miranda, Roberto Venti, Filippo Bosi, Lucio Marino and Franco Mutinelli 187

Consumption of honey bees by *Merops apiaster* Linnaeus, 1758 (Aves: Meropidae) in Mediterranean semiarid landscapes: a threat to beekeeping?

Pablo Farinós-Celdrán, Víctor M Zapata, Vicente Martínez-López and Francisco Robledano 193

A pest and disease survey of the isolated Norfolk Island honey bee (*Apis mellifera*) population

Samuel F Malfroy, John M K Roberts, Sabine Perrone, Glynn Maynard and Nadine Chapman 202

Toxicology

The influence of sublethal doses of imidacloprid on protein content and proteolytic activity in honey bees (*Apis mellifera* L.)

Jerzy Wilde, Regina J Frączek, Maciej Siuda, Beata Bąk, Fani Hatjina and Artur Miszczak 212
