

## CONTENTS

**Bacteria and phytoplasmas/Bactéries et phytoplasmes**

- Detection and quantification of ‘*Candidatus Phytoplasma asteris*’ and ‘*Candidatus Liberibacter asiaticus*’ at early and late stages of Huanglongbing disease development  
*A. A. Arratia-Castro, M. E. Santos-Cervantes, Á. P. Arce-Leal, M. G. Espinoza-Mancillas, E. A. Rodríguez Negrete, J. Méndez-Lozano, Y. Arocha-Rosete and N. E. Leyva-López* 411

**Disease control/Moyens de lutte**

- Inhibition of *Fusarium graminearum* and other *Fusarium* species by *Cochliobolus sativus* in culture and on barley plants  
*C. Rampitsch, R. Bacala, A. Tekauz and B. D. McCallum* 422
- Use of low-dose UV-C irradiation to control powdery mildew caused by *Podosphaera aphanis* on strawberry plants  
*W. J. Janisiewicz, F. Takeda, B. Nichols, D. M. Glenn, W. M. Jurick II and M. J. Camp* 430

**Epidemiology/Épidémiologie**

- Physiologic specialization of *Puccinia triticina*, the causal agent of wheat leaf rust, in Canada in 2010  
*B. D. McCallum, P. Seto-Goh and A. Xue* 440
- Role of fruit surface mycoflora, wounding and storage conditions on post-harvest disease development on greenhouse tomatoes  
*Z. K. Punja, G. Rodriguez, A. Tirajoh and S. Formby* 448

**Fungal diseases/Maladies fongiques**

- Molecular and morphological characterization of *Moniliophthora roreri* isolates from cacao in Ecuador  
*M. G. Maridueña-Zavala, M. E. Villavicencio-Vásquez, J. M. Cevallos-Cevallos and E. L. Peralta* 460

**Genetics and resistance/Génétique et résistance**

- Virulence of isolates of *Ustilago tritici* collected in Manitoba and Saskatchewan, Canada, from 1999 to 2007  
*J. G. Menzies* 470

**Genomics/Génomique**

- An improved simple method for DNA extraction from fungal mycelia  
*Y. Yang, K. Zuzak and J. Feng* 476

**Soilborne pathogens/Agents pathogènes telluriques**

- Genotype responses of two apple rootstocks to infection by *Pythium ultimum* causing apple replant disease  
*Y. Zhu, S. Shin and M. Mazzola* 483
- Pathogenicity, vegetative compatibility and genetic diversity of *Verticillium dahliae* isolates from sugar beet  
*C. A. Strausbaugh, I. A. Eujayl and F. N. Martin* 492

**Virology/Virologie**

- Development of a reverse transcription loop-mediated isothermal amplification assay for the rapid detection of *Pepper mottle virus*  
*X. Luo, D. Zhang, L. Zheng, J. Peng, F. Li, S. Zhang and Y. Liu* 506

## Disease report/Rapport des maladies

Fruit rot of sweet cherries and raspberries caused by *Penicillium crustosum* and *Mucor piriformis* in South Patagonia, Argentina

S. N. López, M. P. Sangorrín and M. B. Pildain

511

First report of *Stemphylium solani* causing leaf spot on wild eggplant in China

X.-W. Xie, Z.-X. Zhang, Y.-Y. Wang, Y.-X. Shi, A.-L. Chai, G.-F. Du and B.-J. Li

517

First report of *Sclerotinia* rot on *Andrographis paniculata* in China

Y.-X. Shi, X.-W. Xie, J.-W. Song, Z.-W. Jin, A.-L. Chai, S. Li and B.-J. Li

522

Occurrence and identification of *Nothophoma quercina* causing brown spot of jujube in China

B. Jianyu, W. Xiaoming, S. Yanjiang and D. Canxing

527

## Abstracts/Résumés

British Columbia Regional Meeting, 2016/Réunion régionale de la Colombie-Britannique, 2016

533

Southwestern Ontario Regional Meeting, 2016/Réunion régionale du-ouest de l'Ontario, 2016

541

**Cover illustrations:** (*Left*) Symptoms of Huanglongbing infection on Mexican lime leaves (*Citrus aurantifolia*) caused by 'Candidatus Phytoplasma asteris' and 'Candidatus Liberibacter asiaticus'. For more insight, see the article by A.A. Arratia-Castro et al. in this issue. (*Right*) Post-harvest fruit rot of raspberries caused by *Penicillium crustosum*. For more insight, see the article by S.N. López et al. in this issue.
