Contributors	ix
Dedication: Cary A. Mitchell <i>Robert J. Joly</i>	xiii
1. Identification of Phytomorphs in the Voynich Codex <i>Arthur O. Tucker and Jules Janick</i>	1
I. Introduction and Historical Context	4
II. Phytomorph Identification	5
III. Sources and Techniques	58
Acknowledgments	60
Literature Cited	60
2. Urban Agriculture: Environmental, Economic, and Social Perspectives <i>Steve Hallett, Lori Hoagland, and Emily Toner</i>	65
I. Introduction	66
II. Historical Perspectives	68
III. Global Perspectives	72
IV. The Three Pillars of Sustainability	82
V. New Technologies	98
VI. Urban Agriculture and Food Systems	104
VII. Conclusions	107
Literature Cited	109
3. The Floriculture Vegetative Cutting Industry <i>James E. Faust, John M. Dole, and Roberto G. Lopez</i>	121
I. Scope of the Industry	123
II. Stock-Plant Production	126
III. Postharvest Handling and Physiology	137

IV. Cutting Management and Propagation	148
V. Case Studies	155
VI. Future Directions	162
Literature Cited	165
4. Orchid Biotechnology	173
<i>Wagner A. Vendrame and Amir A. Khoddamzadeh</i>	
I. Introduction	175
II. <i>In Vitro</i> Propagation Technology	178
III. Bioreactor Technology	193
IV. Synthetic Seed Technology (Synseed)	195
V. Cryopreservation Technology	198
VI. Summary and Conclusions	210
Literature Cited	211
5. Chilling Injury in Tomato Fruit	229
<i>Palash Biswas, Andrew R. East, Errol W. Hewett, and Julian A. Heyes</i>	
I. Introduction	231
II. Chilling Injury in Fruit	232
III. Chilling Injury Symptoms in Tomato	241
IV. Time–Temperature Thresholds for CI Symptoms	259
V. Concluding Remarks	264
Acknowledgment	265
Literature Cited	265
6. Oomycete Diseases of Cucurbits: History, Significance, and Management	279
<i>Mohammad Babadoost</i>	
I. Introduction	281
II. Oomycetes	282
III. Oomycete Diseases of Cucurbits and their Management	288
IV. Concluding Remarks	304
Literature Cited	306
7. Huanglongbing: Devastating Disease of Citrus	315
<i>Greg McCollum and Elizabeth Baldwin</i>	
I. Introduction to Citrus	317
II. Huanglongbing Disease	319

III. Changes Induced by CLas Infection	328
IV. Management Strategies to Minimize or Prevent HLB Disease	336
V. HLB Effects on Flavor and Postharvest Quality	345
VI. Conclusions	350
Literature Cited	352
8. Scab and Fire Blight of Apple: Issues in Integrated Pest Management	363
<i>Janna L. Beckerman and George W. Sundin</i>	
I. Introduction	364
II. IPM and Apple Scab	366
III. IPM and Fire Blight	375
IV. Conclusions and Future Trends	383
Acknowledgments	384
Literature Cited	385
Subject Index	391
Cumulative Subject Index	393
Cumulative Contributor Index	429
