Kardiologischer Krankenhausärzte (ALKK)
Sektion Kardiologie im Berufsverband
Deutscher Internisten e.V. (BDI)

CONTENTS

Volume 12, Supplement 1, March 2017

K.-P. Mellwig Editorial Lp(a) – the underestimated cardiovascular risk factor	1
R. Schulz · K.-D. Schlüter PCSK9 targets important for lipid metabolism	2
A. Vogt Hyperlipoproteinaemia(a) – apheresis and emerging therapies	12
K.-P. Mellwig · D. Horstkotte · F. van Buuren Lipoprotein (a) and coronary heart disease – is there an efficient secondary prevention?	18
P. Grützmacher · B. Öhm · S. Szymczak · C. Dorbath · M. Brzoska · C. Kleinert Primary and secondary prevention of cardiovascular disease in patients with hyperlipoproteinemia (a)	22
B. Hohenstein Lipoprotein(a) in nephrological patients	27
E. Orsó · G. Schmitz Lipoprotein(a) and its role in inflammation, atherosclerosis and malignancies	31
R. Klingel · A. Heibges · C. Fassbender · Pro(a)LiFe-Study Group Prevention of cardiovascular complications in patients with Lp(a)-hyperlipoproteinemia and progressive cardiovascular disease by long-term lipoprotein apheresis according to German national guidelines	38
V. J. J. Schettler · C. L. Neumann · C. Peter · T. Zimmermann · U. Julius · E. Roeseler · F. Heigl · P. Grützmacher · H. Blume · A. Vogt · Scientific Board of GLAR for the German Apheresis Working Group The German Lipoprotein Apheresis Registry (GLAR) – almost 5 years on	44
F. Heigl · R. Hettich · E. Mauch · R. Klingel · C. Fassbender Lipoprotein(a)-hyperlipoproteinemia as cause of chronic spinal cord ischemia resulting in progressive myelopathy – successful treatment with lipoprotein apheresis	50
F. van Buuren · D. Horstkotte · C. Knabbe · D. Hinse · K. P. Mellwig Incidence of elevated lipoprotein (a) levels in a large cohort of patients with cardiovascular disease	55
