

Nutrient Cycling in Agroecosystems

Formerly Fertilizer Research

Volume 109 · Number 2 · November 2017

ORIGINAL ARTICLES

Soil aggregates response to tillage and residue management in a double paddy rice soil of the Southern China

Z. Chen · J. Ti · F. Chen 103

Soil CO₂, CH₄, and N₂O fluxes over and between tile drains on corn, soybean, and forage fields under tile drainage management

A. Van Zandvoort · D.R. Lapen · I.D. Clark · C. Flemming · E. Craiovan · M.D. Sunohara · R. Boutz · N. Gottschall 115

Determinants of nitrogen surplus at farm level in Swiss agriculture

P. Jan · C. Calabrese · M. Lips 133

Seeding ratios and phosphate fertilizer on ecosystem carbon exchange of common vetch and oat

C. Luo · S. Wang · L. Zhao · S. Xu 149

Base cations and micronutrients in forest soils along three clear-cut chronosequences in the northeastern United States

J.B. Richardson · C.L. Petrenko · A.J. Friedland 161

Atmospheric nitrogen loss factor (*f*) used in determining nitrogen-based municipal wastewater effluent irrigation rates: design and nitrogen-balance estimated *f* values

S.M. Sendagi · H.A. Elliott 181

Structural equation modeling for the estimation of interconnections between the P cycle and soil properties

M.V.S. Sales · S. Aleixo · A.C. Gama-Rodrigues · E.F. Gama-Rodrigues 193

ERRATUM

Erratum to: A multi-regional soil phosphorus balance for exploring secondary fertilizer potential: the case of Norway

O.S. Hanserud · E. Brod · A.F. Øgaard · D.B. Müller · H. Brattebø 209
