Original Articles

- International market access for Australian tablegrapes through cold treatment of fruit flies with a review of methods, models and data for fresh fruit disinfestation _____ 306
C.P.F. De Lima, E.R. Mansfield and S.R. Poogoda
- Sensory quality of wine: quality assessment by merging ranks of an expert-consumer panel _____ 318
G. De Mets, P. Goos, M. Hertog, C. Peeters, J. Lammertyn and B.M. Nicolai
- Approaches to prevent the light-struck taste in white wine _____ 329
D. Fracassetti, M. Gabrielli, J. Encinas, M. Manara, I. Pellegrino and A. Tirelli
- Effect of the type of oak barrels employed during ageing on the ellagitannin profile of wines _____ 334
I. García-Estévez, M.T. Escribano-Bailón, J.C. Rivas-Gonzalo and C. Alcalde-Eon
- Silica–alginate-encapsulated bacteria to enhance malolactic fermentation performance in a stressful environment _____ 342
G. Simó, E. Fernández-Fernández, J. Vila-Crespo, V. Ruipérez and J.M. Rodríguez-Nogales
- Lipopeptides from *Bacillus subtilis* have potential application in the winemaking process: inhibiting fungal and ochratoxin A contamination and enhancing esters and acids biosynthesis _____ 350
C. Jiang, X. Chen, S. Lei, H. Zhao, Y. Liu and J. Shi
- Sauvignon Blanc aroma and sensory profile modulation from high fining rates _____ 359
K.J. Parish, M. Herbst-Johnstone, F. Bouda, S. Klaere and B. Fedrizzi
- Vine vigour modulates bunch microclimate and affects the composition of grape and wine flavonoids: an unmanned aerial vehicle approach in a Sangiovese vineyard in Tuscany _____ 368
Y. Romboli, S.F. Di Gennaro, S. Mangani, G. Buscioni, A. Matese, L. Genesio and M. Vincenzini
- Pruning after budburst to delay and spread grape maturity _____ 378
P.R. Petrie, S.J. Brooke, M.A. Moran and V.O. Sadras
- Late pruning and carry-over effects on phenology, yield components and berry traits in Shiraz _____ 390
M.A. Moran, V.O. Sadras and P.R. Petrie
- Ground-truthing of remotely sensed within-field variability in a cv. Barbera plot for improving vineyard management _____ 399
M. Gatti, A. Garavani, A. Vercesi and S. Poni
- Future opportunities of proximal near infrared spectroscopy approaches to determine the variability of vineyard water status _____ 409
M.P. Diago, A. Bellincontro, M. Scheidweiler, J. Tardaguila, S. Tittmann and M. Stoll
- Feasibility of discriminating powdery mildew-affected grape berries at harvest using mid-infrared attenuated total reflection spectroscopy and fatty acid profiling _____ 415
T. Petrovic, D. Perera, D. Cozzolino, O. Kravchuk, T. Zanker, J. Bennett and E.S. Scott
- Cover crop differentially affects arthropods, but not diseases, occurring on grape leaves in vineyards _____ 426
F. Vogelweith and D. Thiéry
- Effectiveness of sodium hypochlorite as a disinfestation treatment against genetically diverse strains of grape phylloxera *Daktulosphaira vitifoliae* Fitch (Hemiptera: Phylloxeridae) _____ 432
C.W. Clarke, F. Wigg, S. Nornng and K.S. Powell
- Allometric relationships for estimating vegetative and reproductive biomass in grapevine (*Vitis vinifera* L.) _____ 441
C. Miranda, L.G. Santesteban, J.M. Escalona, F. De Herralde, X. Aranda, M. Nadal, D.S. Intrigliolo, J.R. Castel, J.B. Royo and H. Medrano
- Identity and parentage of some South American grapevine cultivars present in Argentina _____ 452
G. Aliquó, R. Torres, T. Lacombe, J.-M. Boursiquot, V. Laucou, J. Gualpa, M. Fanzone, S. Sari, J. Perez Peña and J.A. Prieto
