

European Journal of Agronomy

Vol. 91

CONTENTS

NOVEMBER 2017

Research Articles

- Efficiency in sugar beet cultivation related to field history
K. Trimpler, N. Stockfisch and B. Märlander 1
- Long-term presence of charcoal increases maize yield in Belgium due to increased soil water availability
B. Kerré, B. Willaert, Y. Cornelis and E. Smolders 10
- Effect of combined deficit irrigation and grass competition at plantation on peach tree root distribution
O. Forey, F. Temani, J. Wery, C. Jourdan and A. Metay 16
- Does intercropping enhance yield stability in arable crop production? A meta-analysis
Md. Raseduzzaman and E.S. Jensen 25
- Plant growth regulator and its interactions with environment and genotype affect maize optimal plant density and yield
W. Zhang, C. Yu, K. Zhang, Y. Zhou, W. Tan, L. Zhang, Z. Li and L. Duan 34
- Predicting the slow decline of root lesion nematodes (*Pratylenchus thornei*) during host-free fallows to improve farm management decisions
J.P.M. Whish, J.P. Thompson, T.G. Clewett, J. Wood and H.E. Rostad 44
- Assessment of uncertainty and sensitivity analyses for ORYZA model under different ranges of parameter variation
J. Tan, Y. Cui and Y. Luo 54
- Effect of biogas digestate, animal manure and mineral fertilizer application on nitrogen flows in biogas feedstock production
A. Herrmann, H. Kage, F. Taube and K. Sieling 63
- Root growth in field-grown winter wheat: Some effects of soil conditions, season and genotype
L. Hodgkinson, I.C. Dodd, A. Binley, R.W. Ashton, R.P. White, C.W. Watts and W.R. Whalley 74
- Cultivar placement affects pollination efficiency and fruit production in European pear (*Pyrus communis*) orchards
M. Quinet and A.-L. Jacquemart. 84
- Assessment of the benefits of frost-sensitive companion plants in winter rapeseed
V. Verret, A. Gardarin, D. Makowski, M. Lorin, S. Cadoux, A. Butier and M. Valantin-Morison 93
