

CONTENTS

Special Issue:**Active layer thermal regime and seasonal frost dynamics in cold-climate environments****Edited by:****Marc Oliva, Paulo Pereira, Jesús Ruiz-Fernández and Alexandre Nieuwendam**

| | |
|--|-----|
| Recent advances in the study of active layer thermal regime and seasonal frost dynamics in cold climate environments M. Oliva, P. Pereira, J. Ruiz-Fernández and A. Nieuwendam | 515 |
| Recent shallowing of the thaw depth at Crater Lake, Deception Island, Antarctica (2006–2014) M. Ramos, G. Vieira, M.A. de Pablo, A. Molina, A. Abramov and G. Goyanes | 519 |
| Evaluation of frozen ground conditions along a coastal topographic gradient at Byers Peninsula (Livingston Island, Antarctica) by geophysical and geoecological methods A. Correia, M. Oliva and J. Ruiz-Fernández | 529 |
| Snow cover evolution, on 2009-2014, at the Limnopolar Lake CALM-S site on Byers Peninsula, Livingston Island, Antarctica M.A. de Pablo, M. Ramos and A. Molina | 538 |
| Active layer dynamics in three topographically distinct lake catchments in Byers Peninsula (Livingston Island, Antarctica) M. Oliva, F. Hrbáček, J. Ruiz-Fernández, M.Á. de Pablo, G. Vieira, M. Ramos and D. Antoniades | 548 |
| Ground temperature and permafrost distribution in Hurd Peninsula (Livingston Island, Maritime Antarctic): An assessment using freezing indexes and TTOP modelling A. Ferreira, G. Vieira, M. Ramos and A. Nieuwendam | 560 |
| Long term active layer monitoring at a warm-based glacier front from maritime Antarctica I.C.C. Almeida, C.E.G.R. Schaefer, R.F.M. Michel, R.B.A. Fernandes, T.T.C. Pereira, A.M. de Andrade, M.R. Francelino, E.I. Fernandes Filho and J.G. Bockheim | 572 |
| Penguin activity modify the thermal regime of active layer in Antarctica: A case study from Hope Bay C.E.G.R. Schaefer, T.T.C. Pereira, I.C.C. Almeida, R.F.M. Michel, G.R. Corrêa, L.P.S. Figueiredo and J.C. Ker | 582 |
| Active layer thermal dynamics at two lithologically different sites on James Ross Island, Eastern Antarctic Peninsula F. Hrbáček, D. Nývlt and K. Láská | 592 |
| Active layer thermal monitoring of a Dry Valley of the Ellsworth Mountains, Continental Antarctica C.E.G.R. Schaefer, R.F.M. Michel, C. Delpupo, E.O. Senra, U.F. Bremer and J.G. Bockheim | 603 |
| Are the climatic factors combined with reindeer grazing affecting the soil CO ₂ emissions in subarctic boreal pine forest? K. Köster, E. Köster, L. Kulmala, F. Berninger and J. Pumpanen | 616 |
| Ground temperatures, landforms and processes in an Atlantic mountain. Cantabrian Mountains (Northern Spain) A. Pisabarro, R. Pellitero, E. Serrano, M. Gómez-Lende and J.J. González-Trueba | 623 |
| Soil temperatures in an Atlantic high mountain environment: The Forcadona buried ice patch (Picos de Europa, NW Spain) J. Ruiz-Fernández, M. Oliva, F. Hrbáček, G. Vieira and C. García-Hernández | 637 |
| Snow control on active layer thickness in steep alpine rock walls (Aiguille du Midi, 3842 m a.s.l., Mont Blanc massif) F. Magnin, S. Westermann, P. Pogliotti, L. Ravanel, P. Deline and E. Malet | 648 |
