

Vol. 37, January 2017

CONTENTS

Hyperspectral indices for quantifying leaf chlorophyll concentrations performed differently with different leaf types in deciduous forests R. Sonobe and Q. Wang	1
Habitat Suitability Models, for ecological study of the alpine marmot in the central Italian Alps M. Galluzzi, M. Armanini, G. Ferrari, F. Zibordi, D. Scaravelli, G. Chirici, S. Nocentini and A. Mustoni	10
SPEDInstabR: An algorithm based on a fluctuation index for selecting predictors in species distribution modeling C. Guisande, E. García-Roselló, J. Heine, J. González-Dacosta, L.G. Vilas, B.J. García Pérez and J.M. Lobo	18
Propagating aleatory and epistemic uncertainty in land cover change prediction process A. Ferchichi, W. Boulila and I.R. Farah	24
Long-term patterns of change in a vanishing cultural landscape: A GIS-based assessment V. Amici, S. Maccherini, E. Santi, D. Torri, F. Vergari and M. Del Monte	38
An ensemble simulation approach for artificial neural network: An example from chlorophyll <i>a</i> simulation in Lake Poyang, China J. Huang and J. Gao	52
Computational modelling of cormorant swarm J. Kempter, P.A. Kowalski and N. Adamkowska	59
Performance of one-class classifiers for invasive species mapping using airborne imaging spectroscopy S. Skowronek, G.P. Asner and H. Feilhauer	66
A Bayesian approach for estimating phosphorus export and delivery rates with the SPATIally Referenced Regression On Watershed attributes (SPARROW) model D.-K. Kim, S. Kaluskar, S. Mugalingam, A. Blukacz-Richards, T. Long, A. Morley and G.B. Arhonditsis	77
