

(Abstracted/Indexed in: AGI's Bibliography and Index of Geology; Biological Abstracts; Biosis; Bulletin Signalétique; Chemical Abstracts/CAS; Current Contents/Agriculture, Biology & Environmental Sciences; Elsevier BIOBASE/Current Awareness in Biological Sciences; Environmental Periodicals Bibliography; Embiology; GEOBASE; Irrigation, Drainage Abstracts; PASCAL; Science Citation Index; SciSearch; Soils and Fertilizers). Also covered in the abstract and citation database Scopus®. Full text available on ScienceDirect®.

Native soil organic matter conditions the response of microbial communities to organic inputs with different stability I.H. Yanardağ, R. Zornoza, F. Bastida, A. Büyükkılıç-Yanardağ, C. García, A. Faz and A.R. Mermut	1
Application of magnetic susceptibility in assessment of heavy metal contamination of Saxonian soil (Germany) caused by industrial dust deposition M. Rachwał, K. Kardel, T. Magiera and O. Bens	10
Improved spatiotemporal monitoring of soil salinity using filtered kriging with measurement errors: An application to the West Urmia Lake, Iran N. Hamzehpour and P. Bogaert	22
Identifying subsoil variation associated with gilgai using electromagnetic induction H.D. Watson, H.L. Neely, C.L.S. Morgan, K.J. McInnes and C.C. Molling	34
Using isotope dilution assays to understand speciation changes in Cd, Zn, Pb and Fe in a soil model system under simulated flooding conditions M. Izquierdo, A.M. Tye and S.R. Chenery	41
Geochemistry of a soil <i>catena</i> developed from loess deposits in a semiarid environment, Sierra Chica de Córdoba, central Argentina A.I. Pasquini, V.A. Campodonico, S. Rouzaut and V. Giampaoli	53
Interaction between selenium and soil organic matter and its impact on soil selenium bioavailability: A review Z. Li, D. Liang, Q. Peng, Z. Cui, J. Huang and Z. Lin	69
Phosphorus fractions and sorption characteristics in a subtropical paddy soil as influenced by fertilizer sources X. Yan, Z. Wei, Q. Hong, Z. Lu and J. Wu	80
Characterization and geochemistry of technogenic magnetic particles (TMPs) in contaminated industrial soils: Assessing health risk via ingestion A. Bourliva, L. Papadopoulou, E. Aidona, K. Giouri, K. Simeonidis and G. Vourlias	86
Magnetic properties of a soil from Southeastern Brazil in the presence of magnetic biomineralization by social insects J.F. Savian, M. Ernesto, O.C. Alves and T.S. Berquó	98
Spatio-temporal variability of soil sulfur content and arylsulfatase activity at a conventionally managed arable field A. Piotrowska-Długosz, A. Siwik-Ziomek, J. Długosz and D. Gozdowski	107
Prediction of soil moisture scarcity using sequential Gaussian simulation in an arid region of China S. Zhang, M. Shao and D. Li	119

(continued from back cover)

Controlled vertical stress in a modified amplitude sweep test (rheometry) for the determination of soil microstructure stability under transient stresses	
D. Holthusen, P. Pértile, J.M. Reichert and R. Horn	129
Corrigendum to “Changes in the soil microbial phospholipid fatty acid profile with depth in three soil types of paddy fields in China” [Geoderma 290 (2017), 69–74]	
X. Li, J. Sun, H. Wang, X. Li, J. Wang and H. Zhang	142
Corrigendum to “Soil with high organic carbon concentration continues to sequester carbon with increasing carbon inputs” [Geoderma 285 (2017) 151–163]	
S.E. Orgill, J.R. Condon, C.A. Kirkby, B.A. Orchard, M.K. Conyers, R.S.B. Greene and B.W. Murphy	143
