

Commentary

- 982** *Michelle Ho, Upmanu Lall, Maura Allaire, Naresh Devineni, Hyun Han Kwon, Indrani Pal, David Raff, and David Wegner*
The future role of dams in the United States of America (doi 10.1002/2016WR019905)

Research Articles

- 999** *Cecilia Svensson, Jamie Hannaford, and Ilaria Prosdocimi*
Statistical distributions for monthly aggregations of precipitation and streamflow in drought indicator applications (doi 10.1002/2016WR019276)
- 1019** *N. K. Christensen, B. J. Minsley, and S. Christensen*
Generation of 3-D hydrostratigraphic zones from dense airborne electromagnetic data to assess groundwater model prediction error (doi 10.1002/2016WR019141)
- 1039** *James L. McCallum, Peter. G. Cook, Shawan Dogramaci, Roland Purtschert, Craig T. Simmons, and Lawrence Burk*
Identifying modern and historic recharge events from tracer-derived groundwater age distributions (doi 10.1002/2016WR019839)
- 1057** *Jan Vanderborght, Thomas Fetzer, Klaus Mosthaf, Kathleen M. Smits, and Rainer Helmig*
Heat and water transport in soils and across the soil-atmosphere interface: 1. Theory and different model concepts* (doi 10.1002/2016WR019982)

*This article is a companion to *Fetzer et al.* [2017], doi: 10.1002/2016WR019983.
- 1080** *Thomas Fetzer, Jan Vanderborght, Klaus Mosthaf, Kathleen M. Smits, and Rainer Helmig*
Heat and water transport in soils and across the soil-atmosphere interface: 2. Numerical analysis* (doi 10.1002/2016WR019983)

*This article is a companion to *Vanderborght et al.* [2017], doi: 10.1002/2016WR019982.
- 1101** *Jennifer L. Druhan and Kate Maher*
The influence of mixing on stable isotope ratios in porous media: A revised Rayleigh model* (doi 10.1002/2016WR019666)

*This article is part of a Special Section—Concentration-discharge Relations in the Critical Zone
- 1125** *Jan Magnusson, Adam Winstral, Andreas S. Stordal, Richard Essery, and Tobias Jonas*
Improving physically based snow simulations by assimilating snow depths using the particle filter (doi 10.1002/2016WR019092)
- 1144** *Munir Ahmad Nayak and Gabriele Villarini*
A long-term perspective of the hydroclimatological impacts of atmospheric rivers over the central United States (doi 10.1002/2016WR019033)
- 1167** *M. Ulrich, H. Matthes, L. Schirrmeister, J. Schütze, H. Park, Y. Iijima, and A. N. Fedorov*
Differences in behavior and distribution of permafrost-related lakes in Central Yakutia and their response to climatic drivers (doi 10.1002/2016WR019267)
- 1189** *Muhammad Muniruzzaman and Massimo Rolle*
Experimental investigation of the impact of compound-specific dispersion and electrostatic interactions on transient transport and solute breakthrough (doi 10.1002/2016WR019727)
- 1210** *Adam J. Hawkins, Don B. Fox, Matthew W. Becker, and Jefferson W. Tester*
Measurement and simulation of heat exchange in fractured bedrock using inert and thermally degrading tracers (doi 10.1002/2016WR019617)
- 1231** *Guillaume Pirot, Niklas Linde, Grégoire Mariethoz, and John H. Bradford*
Probabilistic inversion with graph cuts: Application to the Boise Hydrogeophysical Research Site (doi 10.1002/2016WR019347)
- 1251** *V. Heimhuber, M. G. Tulbure, and M. Broich*
Modeling multidecadal surface water inundation dynamics and key drivers on large river basin scale using multiple time series of Earth-observation and river flow data (doi 10.1002/2016WR019858)

- 1270** *F. Moatar, B. W. Abbott, C. Minaudo, F. Curie, and G. Pinay*
Elemental properties, hydrology, and biology interact to shape concentration-discharge curves for carbon, nutrients, sediment, and major ions* (doi 10.1002/2016WR019635)
*This article is part of a Special Section—Concentration-discharge Relations in the Critical Zone
- 1288** *M. Rogger, G. B. Chirico, H. Hausmann, K. Krainer, E. Brückl, P. Stadler, and G. Blöschl*
Impact of mountain permafrost on flow path and runoff response in a high alpine catchment (doi 10.1002/2016WR019341)
- 1309** *Liao-Fan Lin, Ardeshir M. Ebtehaj, Jingfeng Wang, and Rafael L. Bras*
Soil moisture background error covariance and data assimilation in a coupled land-atmosphere model (doi 10.1002/2015WR017548)
- 1336** *David J. Yu, Nikhil Sangwan, Kyungmin Sung, Xi Chen, and Venkatesh Merwade*
Incorporating institutions and collective action into a sociohydrological model of flood resilience* (doi 10.1002/2016WR019746)
*This article is part of a Special Section—Socio-hydrology: Spatial and Temporal Dynamics of Coupled Human-Water Systems
