

Commentary

- 5 *M. Church and J. K. Haschenburger*
What is the “active layer”? (doi 10.1002/2016WR019675)

Research Articles

- 11 *F. Jiang and T. Tsuji*
Estimation of three-phase relative permeability by simulating fluid dynamics directly on rock-microstructure images (doi 10.1002/2016WR019098)
- 33 *Wolfgang Durner, Sascha C. Iden, and Georg von Unold*
The integral suspension pressure method (ISP) for precise particle-size analysis by gravitational sedimentation (doi 10.1002/2016WR019830)
- 49 *Nils Gueting, Thomas Vienken, Anja Klotzsche, Jan van der Kruk, Jan Vanderborght, Jef Caers, Harry Vereecken, and Andreas Englert*
High resolution aquifer characterization using crosshole GPR full-waveform tomography: Comparison with direct-push and tracer test data (doi 10.1002/2016WR019498)
- 73 *Joachim Moortgat*
Adaptive implicit finite element methods for multicomponent compressible flow in heterogeneous and fractured porous media (doi 10.1002/2016WR019644)
- 93 *Albert Carles Brangarí, Xavier Sanchez-Vila, Anna Freixa, Anna M. Romani, Simonetta Rubol, and Daniel Fernández-García*
A mechanistic model (BCC-PSSICO) to predict changes in the hydraulic properties for bio-amended variably saturated soils (doi 10.1002/2015WR018517)
- 110 *Salvatore Calabrese and Amilcare Porporato*
Multiple outflows, spatial components, and nonlinearities in age theory (doi 10.1002/2016WR019227)
- 127 *Quanrong Wang and Hongbin Zhan*
Intrawellbore kinematic and frictional losses in a horizontal well in a bounded confined aquifer (doi 10.1002/2015WR018252)
- 142 *Cameron Wood, Peter G. Cook, Glenn A. Harrington, and Anthony Knapton*
Constraining spatial variability in recharge and discharge in an arid environment through modeling carbon-14 with improved boundary conditions (doi 10.1002/2015WR018424)
- 158 *Giulia Ercolani and Fabio Castelli*
Variational assimilation of streamflow data in distributed flood forecasting (doi 10.1002/2016WR019208)
- 184 *Søren Jessen, Dieke Postma, Lærke Thorling, Sascha Müller, Jari Leskelä, and Peter Engesgaard*
Decadal variations in groundwater quality: A legacy from nitrate leaching and denitrification by pyrite in a sandy aquifer (doi 10.1002/2016WR018995)
- 199 *Abdullah Cihan, Jens Birkholzer, Luca Trevisan, Ana Gonzalez-Nicolas, and Tissa Illangasekare*
Investigation of representing hysteresis in macroscopic models of two-phase flow in porous media using intermediate scale experimental data (doi 10.1002/2016WR019449)
- 222 *K. R. Roche, J. D. Drummond, F. Boano, A. I. Packman, T. J. Battin, and W. R. Hunter*
Benthic biofilm controls on fine particle dynamics in streams* (doi 10.1002/2016WR019041)
- *This article is part of a Special Section—Emergent Aquatic Carbon-nutrient Dynamics as Products of Hydrological, Biogeochemical, and Ecological Interactions
- 237 *Richard Niswonger, Ramon Naranjo, David Smith, Jim Constantz, Kip Allander, Donald Rosenberry, Bethany Neilson, Michael R. Rosen, and David Stonestrom*
Nutrient processes at the stream-lake interface for a channelized versus unmodified stream mouth (doi 10.1002/2016WR019538)
- 257 *Nancy A. Barth, Gabriele Villarini, Munir A. Nayak, and Kathleen White*
Mixed populations and annual flood frequency estimates in the western United States: The role of atmospheric rivers (doi 10.1002/2016WR019064)

- 270** *Wilfried Brutsaert, Wei Li, Atsuhiko Takahashi, Tetsuya Hiyama, Lu Zhang, and Wenzhao Liu*
Nonlinear advection-aridity method for landscape evaporation and its application during the growing season in the southern Loess Plateau of the Yellow River basin (doi 10.1002/2016WR019472)
- 283** *Youhua Ran, Xin Li, Rui Jin, Jian Kang, and Michael H. Cosh*
Strengths and weaknesses of temporal stability analysis for monitoring and estimating grid-mean soil moisture in a high-intensity irrigated agricultural landscape* (doi 10.1002/2015WR018182)
- *This article is part of a Special Section—Disturbance Hydrology
