

TRENDS IN FOOD SCIENCE & TECHNOLOGY

REVIEWS

- Effect of pulsed electrical fields on the structural properties that affect french fry texture during processing** by Maria Botero-Urbe, Melissa Fitzgerald, Robert G. Gilbert and Jocelyn Midgley 1
- Mountain food products: A broad spectrum of market potential to be exploited** by Natália Martins and Isabel C.F.R. Ferreira 12
- The emerging use of mycosterols in food industry along with the current trend of extended use of bioactive phytosterols** by Rúbia C.G. Corrêa, Rosane M. Peralta, Adelar Bracht and Isabel C.F.R. Ferreira 19
- Emerging preservation technologies in grapes for winemaking** by Antonio Morata, Iris Loira, Ricardo Vejarano, Carmen González, María Jesús Callejo and José Antonio Suárez-Lepe 36
- The importance of food naturalness for consumers: Results of a systematic review** by Sergio Román, Luis Manuel Sánchez-Siles and Michael Siegrist 44
- Microwave-assisted food processing technologies for enhancing product quality and process efficiency: A review of recent developments** by Flora-Glad Chizoba Ekezie, Da-Wen Sun, Zhang Han and Jun-Hu Cheng 58
- Omega-3 polyunsaturated fatty acids and mitochondria, back to the future** by Marcos Roberto de Oliveira, Seyed Fazel Nabavi, Seyed Mohammad Nabavi and Fernanda Rafaela Jardim 76

(Contents continued overleaf)

Emerging non-destructive terahertz spectroscopic imaging technique: Principle and applications in the agri-food industry by Kaiqiang Wang, Da-Wen Sun and Hongbin Pu	93
Food industry by-products used as functional ingredients of bakery products by Z.E. Martins, O. Pinho and I.M.P.L.V.O. Ferreira	106
The production of gluten-free beer: Degradation of hordeins during malting and brewing and the application of modern process technology focusing on endogenous malt peptidases by Roland Kerpes, Susann Fischer and Thomas Becker	129
Updated knowledge about pyranoanthocyanins: Impact of oxygen on their contents, and contribution in the winemaking process to overall wine color by Cindy Quagliari, Michael Jourdes, Pierre Waffo-Teguo and Pierre-Louis Teissedre	139
What's new in biopotential of fruit and vegetable by-products applied in the food processing industry by Hanna Kowalska, Kinga Czajkowska, Joanna Cichowska and Andrzej Lenart	150
Acceleration of microwave-assisted extraction processes of food components by integrating technologies and applying emerging solvents: A review of latest developments by Flora-Glad Chizoba Ekezie, Da-Wen Sun and Jun-Hu Cheng	160
Crafting and applying a tool to assess food literacy: Findings from a pilot study by Rocco Palumbo, Carmela Annarumma, Paola Adinolfi, Stefania Vezzosi, Ersilia Troiano, Giuseppina Catinello and Rosalba Manna	173
Hurdles in Predicting Antioxidant Efficacy in Oil-in-water emulsions by Eric A. Decker, D. Julian McClements, Claire Bourlieu-Lacanal, Erwann Durand, Maria Cruz Figueroa-Espinoza, Jérôme Lecomte and Pierre Villeneuve	183
Bioaccessibility of bioactive compounds from fruits and vegetables after thermal and nonthermal processing by Francisco J. Barba, Lilian R.B. Mariutti, Neura Bragagnolo, Adriana Z. Mercadante, Gustavo V. Barbosa-Cánovas and Vibeke Orlien	195
Principles and applications of spectroscopic techniques for evaluating food protein conformational changes: A review by Kaiqiang Wang, Da-Wen Sun, Hongbin Pu and Qingyi Wei	207
Rutin: A review on extraction, identification and purification methods, biological activities and approaches to enhance its bioavailability by Beatriz Gullón, Thelmo A. Lú-Chau, María Teresa Moreira, Juan M. Lema and Gemma Eibes	220
Microwave processing techniques and their recent applications in the food industry by Qiushan Guo, Da-Wen Sun, Jun-Hu Cheng and Zhong Han	236
Globular plant protein aggregates for stabilization of food foams and emulsions by Luca Amagliani and Christophe Schmitt	248
Impact of conventional and non-conventional processing on prickly pear (<i>Opuntia spp.</i>) and their derived products: From preservation of beverages to valorization of by-products by Francisco J. Barba, Predrag Putnik, Danijela Bursać Kovačević, Mahesha M. Poojary, Shahin Roohinejad, José M. Lorenzo and Mohamed Koubaa	260

(contents continued)

Genipin: A natural blue pigment for food and health purposes by Iramaia Angélica Neri-Numa, Marina Gabriel Pessoa, Bruno Nicolau Paulino and Glaucia Maria Pastore 271

COMMENTARIES

Food fraud vulnerability and its key factors by Saskia M. van Ruth, Wim Huisman and Pieter A. Luning 70

The need for consumer science and regulatory science research on functional foods with health claims - What should we do to harmonize science and technology with society? 280
by Nanae Tanemura, Naobumi Hamadate and Hisashi Urushihara
