

## **Contents**

---

- 87      **Assessment of species diversity and impact of pollution on limnological conditions of River Ganga**  
*Gagan Matta and D.P. Uniyal*
- 103     **Sensitivity and uncertainty-based evaluation and simulation of MIKE SHE model in Guishui River Basin, Beijing, China**  
*Jing Zhang, Zhen Zheng and Binbin Guo*
- 114     **Application of ensemble methods for classification of water quality**  
*Mohamad Sakizadeh*
- 132     **Drought assessment using standardised precipitation evaporation index and its association with southern oscillation index in the Northwestern Bangladesh**  
*Ahmad Hasan Nury, Khairul Hasan, Maruf Dustegir and Md. Jahir Bin Alam*
- 159     **Geo-hydroclimatological-based estimation of sediment yield by the artificial neural network**  
*Mohammad Ebrahim Banihabib and Ehsan Emami*
- 178     **Assessing the water quality in coastal aquifer of Chennai, India – a case study**  
*A. Annapoorani, A. Murugesan, A. Ramu and N.G. Renganathan*
