

**Invited Review****Sugar Metabolism and Fruit Development in the Tomato**

.....Y. Kanayama 417

**Original Articles****Chilling Requirements and Blooming Dates of Leading Peach Cultivars and a Promising Early Maturing Peach Selection, Momo Tsukuba 127**

.....Y. Sawamura, Y. Suesada, T. Sugiura and H. Yaegaki 426

**Selection of Prune (*Prunus domestica* L.) Cultivars Suitable for the East Asian Temperate Monsoon Climate: Ripening Characteristics and Fruit Qualities of Certain Prunes in a Warm Southwest Region of Japan**

.....K. Ohata, Y. Togano, T. Matsumoto, Y. Uchida, T. Kurahashi and H. Itamura 437

**Anatomical Observations of the Citrus Fruit Abscission Zone and Morphological Changes of the Cells during Secondary Physiological Fruit Drop**

.....X. Li, A. Kitajima, K. Kataoka, R. Takisawa and T. Nakazaki 447

**Existence of Genetic Differences in Pellicle Peelability in Japanese Chestnut (*Castanea crenata* Sieb. et Zucc.) Cultivars and Selections with Difficult-peeling Pellicles**

.....N. Takada, M. Yamada, S. Nishio, Y. Sawamura, A. Sato, N. Onoue and T. Saito 456

**Optimum Conditions for On-tree Ethanol-sticker Treatment for Astringency Removal in 'Taitetsu' and 'Taiten' Persimmons**

.....A. Yamasaki, H. Yakushiji, H. Iwamoto, A. Azuma and H. Sugiura 463

**Effects of Stem Constriction Using Steel Washer Rings on the Soluble Solids Content of Pepino (*Solanum muricatum* Ait.) Fruit**

.....K. Takahata 470

**Highly Efficient Agroinoculation Method for Tomato Plants with *Tomato Yellow Leaf Curl Kanchanaburi Virus***

.....S. Koeda, K. Homma, Y. Tanaka, E. Kesumawati, S. Zakaria and S. Kanzaki 479

**Parthenocarpy in the Tomato (*Solanum lycopersicum* L.) Cultivar 'MPK-1' is Controlled by a Novel Parthenocarpic Gene**

.....R. Takisawa, T. Maruyama, T. Nakazaki, K. Kataoka, H. Saito, S. Koeda, T. Nunome, H. Fukuoka and A. Kitajima 487

**Hairy Vetch Becomes an Alternative Basal N Fertilizer in Low-input Fresh-market Tomato Production in a Plastic High Tunnel**

.....R. A. Muchanga, T. Hirata and H. Araki 493

**Analysis of Varietal Differences in the Fructo-oligosaccharide Accumulation Profile among Onion (*Allium cepa* L.) Cultivars Grown by Spring-sown Cultivation**

.....T. Maeda, A. Watanabe, D. Z. Wambrauw, S. Osanai, K. Honda, S. Oku, H. Shimura, T. Suzuki, A. Yamasaki, Y. Okabe, K. Ueno and S. Onodera 501

**Responses of Leaf Photosynthesis, Plant Growth and Fruit Production to Periodic Alteration of Plant Density in Winter Produced Single-truss Tomatoes**

.....C. Jiang, M. Johkan, M. Hohjo, S. Tsukagoshi, M. Ebihara, A. Nakaminami and T. Maruo 511

**Gibberellin is not Associated with the Enhancing Effect of 2,4-Pyridinedicarboxylic Acid on Flower Opening of 'Light Pink Barbara' Carnation**

.....S. Morita, S. Sugiyama, Y. Nomura, T. Masumura and S. Satoh 519

***LhMYB12*, Regulating Tepal Anthocyanin Pigmentation in Asiatic Hybrid Lilies, is Derived from *Lilium dauricum* and *L. bulbiferum***

.....M. Yamagishi and T. Nakatsuka 528

**Seasonal Changes in Functional Component Contents in Mulberry (*Morus alba* L.) Leaves**

.....M. Sugiyama, T. Katsube, A. Koyama and H. Itamura 534

**Metabolite Composition of Grapefruit (*Citrus paradisi*) Grown in Japan Depends on the Growing Environment and Harvest Period**

.....Y. Kimura, M. Naeshiro, Y. Tominaga, T. Anai and F. Komai 543
