ARTICLES

- The Compostable Plastic Poly(lactic) Acid Causes a Temporal Shift in Fungal Communities in Maturing Compost
Mehlika Karamanlioglu, Richard Preziosi, and Geoffrey D. Robson 211
- Treatment of Source-Separated Human Feces via Lactic Acid Fermentation Combined with Thermophilic Composting
N. Andreev, M. Ronteltap, B. Boincean, and P. N. L. Lens 220
- Does Compost Selection Impact Green Roof Substrate Performance? Measuring Physical Properties, Plant Development, and Runoff Water Quality
Jason M. Matlock and D. Bradley Rowe 231
- Changes in Availability of Plant Nutrients during Composting of Cow Manure with Poplar Leaf Litter
Zobia Anwar, Muhammad Irshad, Muhammad Bilal, Usman Irshad, Farhan Hafeez, and Gary Owens 242
- Ecoenzymes as Indicators of Compost to Suppress *Rhizoctonia Solani*
Deborah A. Neher, Lynn Fang, and Thomas R. Weicht 251
- The Maturity and CH₄, N₂O, NH₃ Emissions from Vermicomposting with Agricultural Waste
Fan Yang, Guoxue Li, Bing Zang, and Zhiye Zhang 262
- Assessing How the Ratio of Barley Mash to Wood Chips in Compost Affects Rates of Microbial Processing and Subsequent Vegetable Yield
Gaston Small, Brendan Sisombath, Lauren Reuss, Russ Henry, and Adam Kay 272
- Vermicompost and Vermiwash Minimized the Influence of Salinity Stress on Growth Parameters in Potato Plants
José de Jesús Pérez-Gómez, Miguel Abud-Archila, Juan José Villalobos-Maldonado, Samuel Enciso-Saenz, Héctor Hernández de León, Víctor Manuel Ruiz-Valdiviezo, and Federico Antonio Gutiérrez-Miceli 282
