

<b>Functional analysis of a rice tapetum specific (RTS) gene promoter variant identified in rice cultivar IR64</b>	<b>127-136</b>
Narattam Sikdar, Anirban Chakraborty, Jagannath Bhattacharyya, Saikat Chakraborty, Bikas Ranjan Pati, Soumitra Kumar Sen and Sudip Kumar Ghosh*	
<b>Prediction of cis-regulatory elements for a detailed insight of RuvB family genes from <i>Oryza sativa</i></b>	<b>137-149</b>
Shabnam K. Saifi, Nishat Passricha, Durga Madhab Swain and Narendra Tuteja*	
<b>Genetic analysis of blast resistant gene in rice (<i>Oryza sativa</i> L.) cultivars</b>	<b>150-159</b>
SK Sinha*, AK Sarawgi and AK Singh	
<b>Genetic diversity and population structure using linked SSR markers for heat stress tolerance in rice</b>	<b>160-170</b>
Sudipti Mohapatra, E Pandit, SR Barik, BC Patra and SK Pradhan*	
<b>Development of advanced breeding lines of rice for drought tolerance based on physiological and yield traits</b>	<b>171-175</b>
Rahul K. Verma, PC Dey, SK Chetia and MK Modi*	
<b>Assessment of polymorphism at molecular level, association studies, multivariate analysis and genetic diversity among recombinant inbred lines of rice (<i>Oryza sativa</i> L.)</b>	<b>176-187</b>
S Mohanty, N Mohanty, S Sulakshana, SK Pradhan, SK Dash and L Behera*	
<b>Analysis of quantitative genetic variation using aromatic and non aromatic genotypes in rice</b>	<b>188-195</b>
L Krishna*, Ch Surender Raju and S Sudheer Kumar	
<b>Identification of rice varieties on the basis of seed characteristics through various chemical tests</b>	<b>196-201</b>
Sumita Das*, KC Muduli and SK Swain	
<b>Nutrient uptake and yield of rice (<i>Oryza sativa</i> L.) as influenced by coal-derived potassium humate and chemical fertilizers</b>	<b>202-209</b>
Dileep Kumar*, AP Singh and Anjani Kumar	
<b>Functional characterization of phosphate solubilizing bacteria of coastal rice soils of Odisha, India</b>	<b>210-221</b>

<b>Market outlook of major paddy markets in India</b>	<b>222-228</b>
M Srikala*, I Bhavani Devi, S Rajeswari, G Mohan Naidu and SV Prasad	
<b><u>SHORT COMMUNICATION</u></b>	
<b>Assessment of the per se performance and genetic variability of grain quality traits of promising induced mutant lines in the M<sub>3</sub> generation of ADT 47 rice</b>	<b>229-235</b>
D Rajarajan*, R Saraswathi, D Sassikumar and M Umadevi	
<b>Stability analysis for grain yield in rice in demonstrations conducted during <i>rabi</i> season in India</b>	<b>236-240</b>
NN Jambhulkar*, NC Rath, LK Bose, HN Subudhi, Bwajit Mondal, Lipi Das and J Meher	
<b>Statistical analysis of multi-environmental rice yield trial in Bastar district of Chhattisgarh</b>	<b>241-245</b>
DP Singh, RR Saxena, YK Sahu, Narendra Kumawat, Rakesh Kumar* and D Mandal	
<b>Correlation and phenotypic path coefficient studies in rice under system of aerobic rice production</b>	<b>246-248</b>
Priyanka Das, JML Gulati* and Sarthak Pattanyak	
<b>Delineation of major and micronutrient status of soils of rice based cropping system in Mayurbhanj district of Odisha</b>	<b>249-251</b>
DR Sarangi*, AK Chatterjee, D Jena, RK Mohanta and SK Swain	
<b>Instructions to Author</b>	<b>252-252</b>
