

Contents

- 191 **Assessing irrigation network performance based on different climate change and water supply scenarios: a case study in Northern Iran**
Zohreh Dehghan, Farshad Fathian, Saeid Eslamian and Jan Franklin Adamowski
- 209 **Multiple regression modelling approach for rainfall prediction using large-scale climate indices as potential predictors**
H.M. Rasel, Monzur Alam Imteaz and Fatemeh Mekanik
- 226 **Introducing hydrochemical diagnostic tools to differentiate sources of salinity, Southern Iran**
Ali Kouchekezadeh and Mehdi Zarei
- 251 **Rainwater tank analysis tools, climatic and spatial variability: a case study for Sydney**
Monzur A. Imteaz, Muhammad Moniruzzaman and Md. Rezaul Karim
- 266 **Analysis of drought transitions using log-linear models in Iran**
Mehdi Bahrami, Abdol Rassoul Zarei and Safie Chakav
- 279 **Climate change fingerprints in lower Euphrates basin: climate and flow data trend analysis**
Monzur A. Imteaz, Wesam Mahmood, Khaled A. Sagar and Abdullah Yilmaz
- 294 **Precipitation change assessment over upper Bagmati river basin using regional bias corrected GCM data**
Binaya Kumar Mishra
