Greenhouse Gas Emissions: Sources and Sinks in Canadian Agro-Ecosystems

Émissions de gaz à effet de serre : les sources et les puits dans les agroécosystèmes canadiens

v–viii

Preface / Préface

REVIEW

**Janell C. Rempel, Suren N. Kulshreshtha,
Beyhan Y. Amichev, and Ken C.J. Van Rees**

341–352

Costs and benefits of shelterbelts: A review of producers' perceptions and mind map analyses for Saskatchewan, Canada

ARTICLES

**Chukwudi C. Amadi, Ken C.J. Van Rees,
and Richard E. Farrell**

353–367

Greenhouse gas mitigation potential of shelterbelts: Estimating farm-scale emission reductions using the Holos model

**Beyhan Y. Amichev, Murray J. Bentham,
Suren N. Kulshreshtha, Colin P. Laroque,
Joseph M. Piwowar, and Ken C.J. Van Rees**

368–381

Carbon sequestration and growth of six common tree and shrub shelterbelts in Saskatchewan, Canada

**Mario A. Cuéllar, Suzanne E. Allaire,
Sébastien F. Lange, Robert L. Bradley,
William F.J. Parsons, David Rivest,
and Alain Cogliastro**

382–393

Greenhouse gas dynamics in a tree-based intercropping system compared with an organic conventional system

Gurbir Singh Dhillon and Ken C.J. Van Rees

394–409

Soil organic carbon sequestration by shelterbelt agroforestry systems in Saskatchewan

**Mathieu Gauthier, Robert Bradley, Sébastien Lange,
Suzanne Allaire, William Parsons,
and Mario A. Cuéllar**

410–415

Tree-based intercropping may reduce, while fertilizer nitrate may increase, soil methane emissions

R.F. Grant, T.A. Kinch, R.L. Bradley, J.K. Whalen, A. Cogliastro, S.F. Lange, S.E. Allaire, and W.F.J. Parsons	416–432	Carbon sequestration vs. agricultural yields in tree-based intercropping systems as affected by tree management
Joseph M. Piwowar, Beyhan Y. Amichev, and Ken C.J. Van Rees	433–438	The Saskatchewan shelterbelt inventory
Gustavo Cambareri, Claudia Wagner-Riddle, Craig Drury, John Lauzon, and William Salas	439–451	Anaerobically digested dairy manure as an alternative nitrogen source to mitigate nitrous oxide emissions in fall-fertilized corn
Martin H. Chantigny, Philippe Rochette, Denis A. Angers, Claudia Goyer, Lindsay D. Brin, and Normand Bertrand	452–464	Nongrowing season N ₂ O and CO ₂ emissions — Temporal dynamics and influence of soil texture and fall-applied manure
Mekonnen Giweta, Miles F. Dyck, and Sukhdev S. Malhi	465–473	Effects of long-term fertilization history and current N and S fertilizer applications on nitrous oxide production from S-deficient soils in a laboratory incubation
Mekonnen Giweta, Miles F. Dyck, and Sukhdev S. Malhi	474–486	Growing season nitrous oxide emissions from a Gray Luvisol as a function of long-term fertilization history and crop rotation
Suren Kulshreshtha, Charles Grant, Brian Amiro, Kim Ominski, Getahun Legesse, and Aklilu Alemu	487–496	Economic and greenhouse gas emission impacts of doubling of forage area in Manitoba, Canada
Sébastien F. Lange, Suzanne E. Allaire, Mario A. Cuellar Castillo, and Pierre Dutilleul	497–511	N ₂ O and CO ₂ dynamics in a pasture soil across the frozen period
E.L. Le Riche, A.C. VanderZaag, C. Wagner-Riddle, K. Dunfield, V.K. Sokolov, and R. Gordon	512–521	Do volatile solids from bedding materials increase greenhouse gas emissions for stored dairy manure?
Ping Li, Man Lang, Chunli Li, and Xiyang Hao	522–531	Nitrous oxide and carbon dioxide emissions from soils amended with compost and manure from cattle fed diets containing wheat dried distillers' grains with solubles
Gustavo Cambareri, Claudia Wagner-Riddle, Craig F. Drury, John Lauzon, and William Salas	532–540	A decision tree-based approach to calculate nitrous oxide fluxes from chamber measurements
