

index

greetings 3
Prof. Dr. Otmar D. Wiestler, President of the Helmholtz Association

foreword 5
Prof. Dr. Roland Eils, Editor in Chief

special: systems medicine

systems-based analysis of drug resistance in melanoma 8
Analysis of survival and death signaling pathways in melanoma
using Dynamic Bayesian Network approach
by Philippe Lucarelli, Greta Del Mistro, Ines Müller, Sébastien De Landtsheer, Friedegund Meier, Roland Kontermann, Markus Rehm,
Thomas Sauter and Dagmar Kulms

tickling the retina 13
A research team from Tuebingen examines a visual stimulus processing system of the retina to improve bionic vision
by Daniel L. Rathbun and Zohreh Hosseinzadeh

“the different disciplines speak different languages” 18
Interview with e:Med junior scientist Hamid R. Noori
by Bettina Koblenz and Marco Leuer

systems medicine of atrial fibrillation 22
From cohorts to the laboratory, from laboratory to the clinic
by Julia Krause and Tanja Zeller for the symAtrial consortium

CAPSyS – systems medicine in pneumonia research 26
Predicting progression and new therapy concepts for community-acquired pneumonia
by Peter Ahnert, Martin Witzentrath, Bernd Schmeck, Markus Scholz, Norbert Suttrop and Markus Löffler

signals that never fall silent 30
How morphogenic signaling pathways regulate liver metabolism
by Madlen Matz-Soja

systems medicine for rare tumor types 34
MAPTor-NET – personalized therapy for pancreatic neuroendocrine tumors
by Christine Sers and Kathrin Thedieck

dynamic, flexible and robustly self-renewing? 39
A Leipzig-based research team develops computer models of the self-organization of adult intestinal stem cells
by Maria Herberg, Torsten Thalheim, Marianne Quaas and Jörg Galle

the future of chemical safety assessment 43
How systems toxicology may help to avoid animal testing
by Angela Mally

news from the BMBF 46

news from the helmholtz association 50
From Buildings and Genomics Platforms to Memory Driven Computing
by Joachim Schultze and Dirk Förger

using algorithms to understand single cells	54
Portrait: Carsten Marr by Kristin Hüttmann	
cells as decision-makers	58
Translating biopsy patterns into tumor development prediction by Haralampos Hatzikirou, Juan Carlos Lopez Alfonso and Friedrich Feuerhake	
BioInfra.Prot – bioinformatics for proteome research	62
de.NBI service center supports biomedical research on proteins by Michael Turewicz and Martin Eisenacher	
RNA sequencing for finding the causes of rare diseases	66
Sequencing RNA, and not only DNA, boosts the diagnosis rates of Mendelian disorders by Julien Gagneur	
“personalized medicine is a challenge, but it is also a certainty”	71
Interview with Mike Snyder by Silke Argo	
predicting chronic inflammation and providing personalized treatment	74
Multi-omics analysis and systems medicine models optimize the treatment of chronic inflammatory diseases by Philip Rosenstiel, Andre Franke and Stefan Schreiber	
identifying new epigenetic tumor medication	80
Company Profile of Proteros biostructures GmbH by Adrian Schomburg and Peter Reinemer	
using physical methods to track biological processes	84
Portrait: Jeffrey Moffitt by Kristin Hüttmann	
mapping the core units of the human body: the human cell atlas	88
An international initiative to map all cells in the human body by Roland Eils, Sarah Teichmann and Aviv Regev	
events: gaminfection hackathon	92
Mathematical models in computer games to promote citizen science in lung infection by Julio Vera and Martin Eberhardt	
events	92
