

Ecology and conservation

Availability of food resources for pollinators in three types of lowland meadows

Maria Ziaja, Bożena Denisow, Małgorzata Wrzesień and Tomasz Wójcik 467

Evolution, phylogeny, and biogeography

Molecular taxonomy of the genus *Physokermes* (Hemiptera: Coccidae) species in Greece, based on mtDNA sequencing data

Iosif Papanastasiou, Vassiliki Evangelou, Laetitia Papoutsis, Maria Bouga and Nikolaos Emmanouil 479

Comparative description of mitochondrial genomes of the honey bee *Apis* (Hymenoptera: Apidae): four new genome sequences and *Apis* phylogeny using whole genomes and individual genes

Ah Rha Wang, Jong Seok Kim, Min Jee Kim, Hye-Kyung Kim, Yong Soo Choi and Iksoo Kim 484

Empirical comparison of microsatellite and SNP markers to estimate introgression in *Apis mellifera mellifera*

Melanie Parejo, Dora Henriques, M. Alice Pinto, Gabriele Soland-Reckeweg and Markus Neuditschko 504

Hive product science

Environmental implications for the production of honey from mesquite (*Prosopis laevigata*) in semi-arid ecosystems

Sergio Ernesto Medina-Cuéllar, Deli Nazmín Tirado-González, Marcos Portillo-Vázquez, Marco Andrés López-Santiago and Víctor Hugo Franco-Olivares 507

Pathology and parasitology

Morphological and molecular identification of chalkbrood disease pathogen *Ascosphaera apis* in *Apis cerana cerana*

Dafu Chen, Rui Guo, Cuiling Xiong, Yanzhen Zheng, Chunsheng Hou and Zhongming Fu 516

Promising antimicrobial activity against the honey bee parasite *Nosema ceranae* by methanolic extracts from Chilean native plants and propolis

Nolberto Arismendi, Marisol Vargas, María Dolores López, Yolanda Barría and Nelson Zapata 522

Varroa destructor: when reversion to coumaphos resistance does not happen

Giulia Angelica Mitton, Nicolás Szawarski, Facundo Ramos, Sandra Fuselli, Facundo René Meroi Arcerito, Martín Javier Eguaras, Sergio Roberto Ruffinengo and Matías Daniel Maggi 536

Genetic diversity and prevalence of *Varroa destructor*, *Nosema apis*, and *N. ceranae* in managed honey bee (*Apis mellifera*) colonies in the Caribbean island of Dominica, West Indies

Juliana Rangel, Alejandra Gonzalez, Marla Stoner, Alyssa Hatter and Brenna E. Traver 541

Environment and <i>Varroa destructor</i> management as determinant of colony losses in apiaries under temperate and subtropical climate	
Ana Molineri, Agostina Giacobino, Adriana Pacini, Natalia Bulacio Cagnolo, Julieta Merke, Emanuel Orellano, Ezequiel Bertozzi, Luis Zago, Andrea Aignasse, Hernán Pietronave, Graciela Rodríguez, Paola Crisanti, María Alejandra Palacio and Marcelo Signorini	551
First report of <i>Apis mellifera carnica</i> Ruttner (Hymenoptera, Apidae) in Saudi Arabia parasitized by a phorid parasitoid (Diptera: Phoridae)	
Seif Eldin Abdel Rahman Mohammed	565
First report of the lesser wax moth <i>Achroia grisella</i> F. (Lepidoptera: Pyralidae) consuming polyethylene (silo-bag) in northwestern Argentina	
Adriana Chalup, María Marta Ayup, A. Carolina Monmany Garzia, Agustina Malizia, Eduardo Martin, Ricardo De Cristóbal and Alberto Galindo-Cardona	569
Pollination	
Preliminary survey of the nutritional and palynological traits of honey bee-foraged pollen from Liguria (Italy)	
Ida Conti, Piotr Medrzycki, Antonio Iannone, Francesca Vittoria Grillenzoni, Francesca Corvucci, Davide Dagnino, Gabriele Casazza, Carlo Montanari and Mauro Giorgio Mariotti	572
Sociobiology and behaviour	
Drifting of honey bee queens returning from flights	
Jakub Gąbka	580
Toxicology	
Review: Have suitable experimental designs been used to determine the effects of neonicotinoid insecticides on bee colony performance in the field?	
Francis L. W. Ratnieks, Nicholas J. Balfour and Norman L. Carreck	586
