REVIEW ARTICLE

Unveiling commonalities in understudied habitats of boulder-reefs: life-history traits of the widespread invertebrate and algal inhabitants

K. Liversage and J. Kotta

655

SHORT REPORT

Using citizen science to obtain data on large, floating gelatinous spheres from NE Atlantic, attributed to egg mass of ommastrephid squid (Oegopsida, Cephalopoda, Mollusca)

Halldis Ringvold and Morag Taite

672

ORIGINAL ARTICLES

Marine sponges (Porifera) from the Bahía San Antonio (North Patagonian Gulfs, Argentina), with additions to the phylogeography of the widely distributed *Cliona* aff. *celata* and *Hymeniacion* *perlevis*, and the description of two new species

Marianela Gastaldi, Thiago S. De Paula, Maite A. Narvarte, Gisele Lôbo-Hajdu and Eduardo Hajdu

682

Evaluation of the effects of onboard sorting and experimental holding practices on the post-catch survival of brown shrimp (*Crangon crangon* L.)

Xavier H. C. Vermeersch, Koen Chiers, Annemie Decostere, Stephanie Van Weyenberg and Geertrui Vlaemynck

717

Age estimation, growth and maturity of the Argentine hake (*Merluccius hubbsi* Marini, 1933) along the northernmost limit of its distribution in the south-western Atlantic

Paulo Alberto Silva da Costa, Adriana da Costa Braga, Juliana Monteiro da Silva Vieira, Raquel Rennó M. Martins, Ricardo Raphael Bastos de São-Clemente and Bernardo Roxo Couto

728

Seasonal variation of gelatinous plankton consumption by fish in the South-western Atlantic Ocean: a question of strategy

Luciana Diaz Briz, Felisa Sánchez, Noemí Marí and Gabriel Genzano

739

Interannual phenological variability in two North-East Atlantic populations of *Calanus finmarchicus*

Marina Espinasse, Claudia Halsband, Øystein Varpe, Astthor Gislason, Kristinn Gudmundsson, Stig Falk-Petersen and Ketil Eiane
