

Canadian Journal of Animal Science

Articles

- 213–220 Effects of slaughter weight and growth rate on the *longissimus* muscle metabolic characteristics, and pork sensory quality in pigs of two sexes
Yan Duan, Luigi Faucitano, Joël Rivest, Nancy Graveline, Simon Cliche, and Claude Gariépy
- 221–229 Using portable near-infrared spectroscopy to predict pig subcutaneous fat composition and iodine value
N. Prieto, M.E.R. Dugan, M. Juárez, Ó. López-Campos, R.T. Zijlstra, and J.L. Aalhus
- 230–240 Tenderness and sensory attributes of 11 muscles from carcasses within the Canadian cull cow grades
Jordan C. Roberts, Argenis Rodas-González, Manuel Juárez, Óscar López-Campos, Ivy L. Larsen, and Jennifer L. Aalhus
- 241–249 Effects of dietary lysine level on the content and fatty acid composition of intramuscular fat in late-stage finishing pigs
Taiji Wang, Mark A. Crenshaw, Naresh Regmi, Brian J. Rude, M. Shamimul Hasan, Anuraj T. Sukumaran, Thu Dinh, and Shengfa F. Liao
- 250–259 Producer perceptions of manual and automated milk feeding systems for dairy calves in Canada
Catalina Medrano-Galarza, Stephen J. LeBlanc, Andria Jones-Bitton, Trevor J. DeVries, Jeffrey Rushen, Anne Marie de Passillé, and Derek B. Haley
- 260–270 Transcriptional regulation of milk lipid synthesis by exogenous C16:0 and C18 fatty acids in bovine mammary epithelial cells
Ni Dan, Hang Zhang, Changjin Ao, and Khas-Erdene
- 271–278 Influence of a cocktail of protease and xylanase in different energy densities of corn- and soybean-meal-based diet on growth performance, nutrient digestibility, carcass quality, and gas emission in broilers
D.H. Nguyen, H.N. Tran, H.M. Yun, and I.H. Kim

279–288	Production of Jiggs bermudagrass and the impact of quality milk production and quality of Holstein dairy cows under an intermittent grazing system	E.V. Brandstetter, K.A.P. Costa, M.A.P. da Silva, F.R. Araújo Neto, V.R. da Silva, R.B.S. Neves, W.F. de Souza, and I.P. de Oliveira
289–298	Effects of fenugreek (<i>Trigonella foenum-graecum</i> L.) seed extract supplementation in different energy density diets on growth performance, nutrient digestibility, blood characteristics, fecal microbiota, and fecal gas emission in growing pigs	M.M. Hossain, M. Begum, and I.H. Kim
299–310	Effect of variety and stage of maturity at harvest on nutrient and neutral detergent fiber digestibility of forage barley grown in western Canada	Jayakrishnan Nair, Aaron D. Beattie, David Christensen, Peiqiang Yu, Tim McAllister, Daalkhaijav Damiran, and John J. McKinnon
311–324	Using different levels of glycerine, glucose, or sucrose in broiler starter diets to overcome negative effects of delayed feed access on growth performance	Anhao Wang, Derek Anderson, and Bruce Rathgeber
325–332	Effect of dietary fermented corn in different energy dense diets on growth performance, nutrient digestibility, ileal microorganisms, and fecal noxious gas emission of growing pigs	J.W. Park and I.H. Kim
333–340	Growth performance and expression of genes encoding enzymes involved in methionine and cysteine metabolism in piglets fed increasing sulphur amino acid to lysine ratio during enterotoxigenic <i>Escherichia coli</i> challenge	Roseline K. Kahindi, Alemu Regassa, John K. Htoo, and Charles Martin Nyachoti
341–346	Association of <i>MSTN</i> gene polymorphism (C354T) with performance traits in raccoon dogs	Sylvia Nisztuk, Brygida Ślaska, Grzegorz Zięba, and Iwona Rozempolska-Rucińska
347–353	Impact of rare earth element-enriched yeast on growth performance, nutrient digestibility, blood profile, and fecal microflora in finishing pigs	L. Cai, C.M. Nyachoti, and I.H. Kim
354–361	Conventional solid fermentation alters mycotoxin contents and microbial diversity analyzed by high-throughput sequencing of a <i>Fusarium</i> mycotoxin-contaminated diet	L.J. Yang, Z.B. Yang, W.R. Yang, H.R. Li, C.Y. Zhang, S.Z. Jiang, and X.M. Li
362–367	Using body measurements to estimate body weight in gilts	Mohammad Sheik Al Ard Khanji, César Llorente, María Victoria Falceto, Cristina Bonastre, Olga Mitjana, and María Teresa Tejedor
368–375	Effect of grain type and dried distillers grains plus solubles oil concentration on site of digestion in cattle fed finishing diets	Mary A. Rodenhuis, Faithe E. Keomanivong, Marc L. Bauer, and Kendall C. Swanson
376–385	Carcass characteristics of grass-fed crossbred bulls and steers slaughtered at two different ages	Paulina Pogorzelska-Przybyłek, Zenon Nogalski, Monika Sobczuk-Szul, Cezary Purwin, and Martyna Momot

Short communications

- | | | |
|---------|--|--|
| 386-389 | Change in resting position in dairy calves during the first weeks of life | Endre Pucora and Marcus Clauss |
| 390-393 | Guaranteeing Canadian lamb meat quality using near-infrared spectroscopy on intact rack | M. Juárez, A. Horcada, N. Prieto, J.C. Roberts, M.E.R. Dugan, O. López-Campos, B. Uttaro, I.L. Larsen, S. Hosford, J. Galbraith, and J.L. Aalhus |
| 394-398 | Physico-chemical properties of purified fiber affect their in vitro fermentation characteristics and are linked to in vivo characteristics in pigs | R. Jha and R.T. Zijlstra |
| 399-404 | Does the location of concentrate provision affect voluntary visits, and milk and milk component yield for cows in an automated milking system? | K. Hare, T.J. DeVries, K.S. Schwartkopf-Genswein, and G.B. Penner |
