

New Zealand Journal of

Agricultural Research

VOLUME 61 NUMBER 3 SEPTEMBER 2018

Special Issue: Soil, a Balancing Act Down Under: Selected papers from the combined NZSSS / ASSS conference, Queenstown, New Zealand
Guest editors: Seth Laurenson, Jim Moir and Tony van der Weerden

Preface from the editors

S. Laurenson, J. Moir and T. van der Weerden 313

The odds appear stacked against versatile land: can we change them?
F. Curran-Cournane, N. Golubiewski and L. Buckthought 315

Looking to the future of land evaluation at farm scale
A. D. Mackay, E. J. Dominati, J. M. Rendel and F. J. F. Maseyk 327

Liberating soil data for profitable agriculture and catchment health in the Corangamite region, Australia
P. G. Dahlhaus, C. Nicholson, B. Ryan, A. MacLeod and R. Milne 333

Seen as different, soil clays become more important to soils and also beyond soils
G. J. Churchman, M. Singh and S. Marchuk 340

Geochemical baseline soil surveys for understanding element and isotope variation across New Zealand
M. Rattenbury, A. Martin, T. Baisden, R. Turnbull and K. Rogers 347

Managing soil microbiology: realising opportunities for the productive land-based sectors
S. A. Wakelin 358

Innovations in cropping systems – a step change towards sustainable soil management across Victoria's grain growing regions
M. A. Cann, D. J. Pearl, R. R. Peries and N. deCoursey-Ireland 377

Future expectations of forest soils: increasing productivity within environmental limits using new knowledge
P. W. Clinton 389
