Insights into and Recommendations from Three Real-World Laboratories. An Experience-Based Comparison*
- 60 *Eva Heiskanen, Senja Laakso, Kaisa Matschoss, Julia Backhaus, Gary Goggins, Edina Vadovics*
Designing Real-World Laboratories for the Reduction of Residential Energy Use. Articulating Theories of Change*

SPECIAL ISSUE

LABS IN THE REAL WORLD

At the science-society interface, new forms of experimental and transdisciplinary research approaches, labelled as labs in the real world, have been established to accelerate transformations towards more sustainable societies and to transfer existing knowledge into action. In this special issue funded by the Ministry of Science, Research and Arts Baden-Württemberg, a large variety of empirical and theoretical investigations discuss questions such as transdisciplinarity and learning dimensions, as well as the transformative potential and/or overarching conceptualizations of such labs.
