

CONTENTS

- Heat shock protein 70 (Hsp70) response to elevated temperatures in the endemic Baikal sponge *Lubomirskia baicalensis*
V.B. Itskovich, A.M. Shigarova, O.Y. Glyzina, O.V. Kaluzhnaya and G.B. Borovskii (Russia) 1
- Associations among taxonomic diversity, functional diversity and evolutionary distinctiveness vary among environments
F. Morelli, Y. Benedetti (Czech Republic), P. Perna and R. Santolini (Italy) 8
- Examination of effects of acid and metals on benthic algae in streams using chemical diffusing substrata
D.M. DeNicola, M.G. Stapleton and A.J. Onufrak (USA) 17
- $\delta^{13}\text{C}$, $\delta^{15}\text{N}$, N concentration, C/N, and Ca/Al of *Pinus densiflora* foliage in Korean cities of different precipitation pH and atmospheric NO_2 and SO_2 levels
H.I. Yang, H.-J. Park, K.-S. Lee, S.-S. Lim (Republic of Korea), J.-H. Kwak, S.-I. Lee, S.X. Chang (Canada), S.-M. Lee and W.-J. Choi (Republic of Korea) 27
- Transition from abstract thermodynamic concepts to perceivable ecological indicators
H. Lin, H. Zhang and Q. Song (China) 37
- Biometrical measurements as efficient indicators to assess wild boar body condition
D. Risco, P. Gonçalves, G. Mentaberre, N. Navarro-González, E. Casas-Díaz, D. Gassó, A. Colom-Cadena, X. Fernández-Aguilar, R. Castillo-Contreras, R. Velarde, O. Barquero-Pérez, P. Fernández-Llario, S. Lavín (Spain), C. Fonseca (Portugal) and E. Serrano (Spain, Portugal) 43
- Is terrestrial water storage a useful indicator in assessing the impacts of climate variability on crop yield in semi-arid ecosystems?
C.E. Ndehedehe (Australia, Nigeria), N.O. Agutu (Australia) and O. Okwuashi (Nigeria) 51
- Remote sensing data to assess compositional and structural indicators in dry woodland
V.E. Campos, G.M. Gatica, F.M. Cappa, S.M. Giannoni and C.M. Campos (Argentina) 63
- Measuring the effects of temperature rise on Mediterranean shellfish aquaculture
M. Martinez, M.C. Mangano, G. Maricchiolo, L. Genovese, A. Mazzola and G. Sarà (Italy) 71
- Short-term land use conversions influence the profile distribution of soil salinity and sodicity in northeastern China
P. Yu, S. Liu, H. Yang, G. Fan and D. Zhou (China) 79
- Identification of indicator species at abandoned red mud dumps in comparison to residential and forest sites, accredited to soil properties
M. Gautam, B. Pandey and M. Agrawal (India) 88
- Flow alterations by dams shaped fish assemblage dynamics in the complex Mekong-3S river system
P.B. Ngor (Cambodia, France), P. Legendre (Canada), T. Oberdorff and S. Lek (France) 103
- Age structure as an indicator of poaching pressure: Insights from rapid assessments of elephant populations across space and time
T. Jones (Tanzania), J.J. Cusack, R.A. Pozo (UK), J. Smit (Tanzania, UK), L. Mkuburo, P. Baran, A.L. Lobora, S. Mduma and C. Foley (Tanzania) 115
- The utility of point count surveys to predict wildlife interactions with wind energy facilities: An example focused on golden eagles
M. Sur, J.R. Belthoff, E.R. Bjerre, B.A. Millsap and T. Katzner (USA) 126
- Uncertainty in simulating regional gross primary productivity from satellite-based models over northern China grassland
W. Jia, M. Liu, D. Wang, H. He, P. Shi, Y. Li and Y. Wang (PR China) 134

Landscape structure and composition define the body condition of dung beetles (Coleoptera: Scarabaeinae) in a fragmented tropical rainforest R.P. Salomão, D. González-Tokman, W. Dáttilo, J.C. López-Acosta and M.E. Favila (Mexico)	144	Stream health, topography, and land use influences on the distribution of the Eurasian otter <i>Lutra lutra</i> in the Nakdong River basin, South Korea S. Hong (Republic of Korea), D.-K. Kim (Canada), Y. Do, J.Y. Kim, Y.-M. Kim (Republic of Korea), P. Cowan (New Zealand) and G.-J. Joo (Republic of Korea)	241
An emergy accounting based regional sustainability evaluation: A case of Qinghai in China W. Chen (PR China), Y. Geng (PR China, China), H. Dong, X. Tian, S. Zhong, Q. Wu, Y. Xu, Q. Zhang and S. Li (PR China)	152	Development of a life-cycle impact assessment methodology linked to the Planetary Boundaries framework M.W. Ryberg, M. Owsianiak, K. Richardson and M.Z. Hauschild (Denmark)	250
Evaluation of the use of dermal scutes and blood samples to determine organochlorine pesticides in <i>Crocodylus moreletii</i> : A non-destructive method for monitoring crocodiles and environmental health M.G. Jáuregui, S.E. Padilla, D. Hinojosa-Garro, C. Valdespino and J.R. von Osten (Mexico)	161	Selecting plant species and traits for phytometer experiments. The case of peatland restoration K. Strobl, C. Schmidt (Germany) and J. Kollmann (Germany, Norway)	263
Temporal changes in environmental conditions of a mid-latitude estuary (southern Chile) and its influences in the cellular response of the euryhaline anemone <i>Anthopleura hermaphroditica</i> V.M. Cubillos, E.F. Ramírez, E. Cruces, J.A. Montory, C.J. Segura and D.A. Mardones (Chile)	169	Potential invasiveness by non-indigenous macrozoobenthos in the secondary hydrographic system of a temperate-climate river catchment D. Paganelli, A. Pandolfi, R. Sconfietti, A. Marchini (Italy) and L. Vilizzi (Poland)	274
Thermodynamic based indicators illustrate how a run-of-river impoundment in neotropical savanna attracts invasive species and alters the benthic macroinvertebrate assemblages' complexity M.S. Linares, M. Callisto (Brazil) and J.C. Marques (Portugal)	181	Is afforestation-induced land use change the main contributor to vegetation dynamics in the semiarid region of North China? F. Wang, P. An, C. Huang, Z. Zhang and J. Hao (China)	282
Diatoms as tools for inferring ecotone boundaries in a coastal freshwater wetland threatened by saltwater intrusion V. Mazzei and E. Gaiser (USA)	190	Economic valuation of groundwater protection using a groundwater quality ladder based on chemical threshold levels R. Brouwer (Canada, Switzerland), C.M. Ordens (Australia), R. Pinto (Canada, Portugal) and M.T.C. de Melo (Portugal)	292
Identifying critical thresholds to guide management practices in agro-ecosystems: Insights from bird community response to an open grassland-to-forest gradient P.A. Salgueiro, A. Mira, J.E. Rabaça and S.M. Santos (Portugal)	205	Comprehensive evaluation of global clean energy development index based on the improved entropy method Y.X. He, Z. Jiao and J. Yang (China)	305
Biological surrogates: A word of caution G.F. de Moraes, L.G. dos Santos Ribas, J.C.G. Ortega (Brazil), J. Heino (Finland) and L.M. Bini (Brazil)	214	Large river fish functional diversity responses to improved water quality over a 28 year period J. Parker, Y. Cao, G.G. Sass and J. Epifanio (USA)	322
Updating the habitat conservation institution by prioritizing important connectivity and resilience providers outside J. He, J. Huang, D. Liu, H. Wang and C. Li (China)	219	Improved modeling of gross primary productivity (GPP) by better representation of plant phenological indicators from remote sensing using a process model J. Wang, C. Wu, C. Zhang, W. Ju, X. Wang, Z. Chen (China) and B. Fang (USA)	332
Are remotely sensed traits suitable for ecological analysis? A case study of long-term drought effects on leaf mass per area of wetland vegetation H. Feilhauer (Germany), T. Schmid (Spain), U. Faude (Germany), S. Sánchez-Carrillo and S. Cirujano (Spain)	232	Life Cycle Assessment of China's agroecosystems L. Liang (China, United States), R. Lal (United States), B.G. Ridoutt (Australia), Z. Du, D. Wang, L. Wang, W. Wu and G. Zhao (China)	341
		The dynamics of sand-stabilization services in Inner Mongolia, China from 1981 to 2010 and its relationship with climate change and human activities D. Li, D. Xu, Z. Wang, X. You, X. Zhang and A. Song (China)	351

Ecosystem health in coastal areas targeted by small-scale artisanal fisheries: Insights on monitoring and assessment S. de Juan (Chile, Spain), M.D. Subida, S. Gelcich and M. Fernandez (Chile)	361	Modeling land use change using Cellular Automata and Artificial Neural Network: The case of Chunati Wildlife Sanctuary, Bangladesh K. Islam, Md.F. Rahman (Japan) and M. Jashimuddin (Bangladesh)	439
Assessing the effects of grazing on variations of vegetation NPP in the Xilingol Grassland, China, using a grazing pressure index D. Chi, H. Wang, X. Li, H. Liu and X. Li (China)	372	Cryptogamic communities as a useful bioindication tool for estimating the degree of soil pollution with heavy metals K. Rola and P. Osyczka (Poland)	454
Cuckoo density as a predictor of functional and phylogenetic species richness in the predictive modelling approach: Extension of Tryjanowski and Morelli (2015) paradigm in the analytical context J.Z. Kosicki (Poland) and M. Hromada (Slovakia, Poland)	384	Relationships between indicators of acid-base chemistry and fish assemblages in streams of the Great Smoky Mountains National Park B.P. Baldigo, M.A. Kulp and J.S. Schwartz (United States)	465
Cropland disturbance intensity: Plot-scale measurements, multilevel determinants and applications in rural environmental protection M. Li, Y. Wang, B. Fu, P. Xu, E. Dai and C. Tian (China)	393	Monitoring changes of NDVI in protected areas of southern California T.W. Gillespie, S. Ostermann-Kelm, C. Dong, K.S. Willis, G.S. Okin and G.M. MacDonald (USA)	485
Indicators of sustainability to assess aquaculture systems W.C. Valenti, J.M. Kimpara, B.d.L. Preto and P. Moraes-Valenti (Brazil)	402	One year of transplant: Is it enough for lichens to reflect the new atmospheric conditions? L. Paoli, A. Vannini (Italy), Z. Fačková (Slovakia), M. Guarnieri (Italy), M. Bačkor (Slovakia) and S. Loppi (Italy)	495
Delimitation of ecological corridors in the Brazilian Atlantic Forest J.S. Santos, C.C.C. Leite, J.C.C. Viana, A.R. dos Santos, M.M. Fernandes, V. de Souza Abreu, T.P. do Nascimento, L.S. dos Santos, M.R. de Moura Fernandes, G.F. da Silva and A.R. de Mendonça (Brazil)	414	Replenishment of landscape water with reclaimed water: Optimization of supply scheme using transparency as an indicator D. Ao, L. Luo, M. Dzakpasu, R. Chen, T. Xue and X.C. Wang (China)	503
Estimating soil organic carbon stocks using different modelling techniques in the semi-arid rangelands of eastern Australia B. Wang, C. Waters, S. Orgill, A. Cowie, A. Clark, D. Li Liu, M. Simpson, I. McGowen and T. Sides (Australia)	425	Dynamic selection of environmental variables to improve the prediction of aphid phenology: A machine learning approach P. Holloway (UK, Ireland), D. Kudenko (UK, Russia) and J.R. Bell (UK)	512
