

CONTENTS

Through the jungle of methods quantifying multiple-site resemblance D. Schmera and J. Podani	1	Determining quality of water in reservoir using machine learning J.-S. Chou, C.-C. Ho and H.-S. Hoang	57
Reconsidering the estimation of costs of phenotypic plasticity using the robust ridge estimator H. Michimae, A. Yoshida, T. Emura, M. Matsunami and K. Nishimura	7	Bird species identification via transfer learning from music genres S. Ntalampiras	76
Remote sensing of water quality based on HJ-1A HSI imagery with modified discrete binary particle swarm optimization-partial least squares (MDBPSO-PLS) in inland waters: A case in Weishan Lake Y. Cao, Y. Ye, H. Zhao, Y. Jiang, H. Wang, Y. Shang and J. Wang	21	Infrastructure development and its influence on agricultural land and regional sustainable development S. Bacior and B. Prus	82
An accurate ecological footprint analysis and prediction for Beijing based on SVM model L. Liu and Y. Lei	33	Simulating the architecture of a termite incipient nest using a convolutional neural network J.-K. Seo, S. Baik and S.-H. Lee	94
Management of acoustic risks for buildings near airports T. Camara, B. Kamsu-Foguem, B. Diourte, J.P. Faye and O. Hamadoun	43	Future climate and habitat distribution of Himalayan Musk Deer ( <i>Moschus chrysogaster</i> ) P. Lamsal, L. Kumar, A. Aryal and K. Atreya	101
		Buffered or bundled, least-cost paths are not least-cost corridors: Computational experiments on path-based and wide-path-based models for conservation corridor design and effective distance estimation T. Shirabe	109
