

Marine Biology Research

Volume 14 - Number 4 - Pages 335 - 419 2018

Contents

ORIGINAL ARTICLES

- A divergent lineage among *Octopus minor* (Sasaki, 1920) populations in the Northwest Pacific supported by DNA barcoding
Ran Xu, Qikang Bo and Xiaodong Zheng 335
- Comparative study on the surface ultrastructures of fertilized eggs of three *Sebastes* species
Dongkui Gao, Xiumei Zhang, Wentao Li and Peidong Zhang 345
- Age and growth differences in two populations of the edible marine gastropod *Buccinanops globulosus*
V. Bökenhans, G. Bigatti, M. García Asorey and A. Averbuj 354
- Morphometry and growth of sea pen species from dense habitats in the Gulf of St. Lawrence, eastern Canada
F.J. Murillo, B.W. MacDonald, E. Kenchington, S.E. Campana, B. Sainte-Marie and M. Sacau 366
- Demographic implications of predatory wrasses on low-density *Diadema antillarum* populations
Ruber Rodríguez-Barreras 383
- The effect of substrate media on the survival and growth of the eelgrass *Zostera marina*
Qiang Xu, Pei-Dong Zhang, Yan-Shan Liu, Xi-Tao Wang and Wen-Tao Li 392
- Intertidal mussel beds from the South-western Atlantic show simple structure and uniform appearance: does environmental harshness explain the community?
Mariana Adami, Evangelina Schwindt, Alejandro Tablado, Javier Calcagno, Juan Carlos Labraga and Lobo Orensanz 403
